## Local Requirements

Each municipality has its own requirements that must be met in the C.3 stormwater submittals that are included with planning and building permit applications. The municipalities may include copies of these requirements in this Appendix when they distribute this handbook to project applicants. For those agencies that provide information regarding local requirements to the Countywide Program, links to this information will be posted on the Internet version of this handbook.

Examples of documents that agencies may include in this Appendix include:

- NPDES Permit Application Checklist
- Impervious Surface Form
- Local Source Control Measures List
- Maintenance Agreement
