FAX (650) 829-3855

September 20, 2018

Mr. Bruce H. Wolfe
Executive Officer
San Francisco Bay Regional Water Quality Control Board
1515 Clay Street, Suite 1400
Oakland, CA 94612

Subject: **City of South San Francisco**
FY 2017/18 Annual Report

Dear Mr. Wolfe:

This letter and Annual Report with attachments is submitted by the City of South San Francisco pursuant to Permit Provision C.17.a of the Municipal Regional Stormwater NPDES Permit (MRP), Order R2-2015-0049, NPDES Permit No CAS612008 issued by the San Francisco Bay Regional Water Quality Control Board. The Annual Report provides documentation of compliance activities conducted during FY 2017/18 and related accomplishments.

Please contact Andrew Wemmer at 650-829-3880 regarding any questions or concerns.

Very truly yours,

Andrew Wemmer
Environmental Compliance Supervisor

**CITY OF SOUTH SAN FRANCISCO
FY 2017/18 ANNUAL REPORT**

Certification Statement

"I certify, under penalty of law, that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to ensure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted, is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

Signature of Duly Authorized Representative:

Andrew Wemmer
Environmental Compliance Supervisor

E-mail Address:	Andrew.wemmer@ssf.net				

Section 2 - Provision C.2 Reporting Municipal Operations

Program Highlights and Evaluation

Highlight/summarize activities for reporting year:

Summary:

The City of South San Francisco has developed and utilizes an electronic data management system for full trash capture device O&M inspection/maintenance.

The City of South San Francisco participated in the Program's

- 1) Municipal Maintenance Subcommittee in Fiscal Year 17-18;
- 2) Development of a trash full capture device O&M inspection/maintenance data management system and;
- 3) Development of a pesticide data management program, and the Parks Department uses an internal pesticide tracking log, and also tracks this data on the California Pesticide Permitting and Use Reporting (CalAgPermits.org) database.

Refer to the C.2 Municipal Operations section of the SMCWPPP FY 17-18 Annual Report for a description of activities implemented at the countywide and/or regional level.

C.2.a. ► Street and Road Repair and Maintenance

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

Y	Control of debris and waste materials during road and parking lot installation, repaving or repair maintenance activities from polluting stormwater
Y	Control of concrete slurry and wastewater, asphalt, pavement cutting, and other street and road maintenance materials and wastewater from discharging to storm drains from work sites.
Y	Sweeping and/or vacuuming and other dry methods to remove debris, concrete, or sediment residues from work sites upon completion of work.

Comments:

C.2.b. ► Sidewalk/Plaza Maintenance and Pavement Washing

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

Y	Control of wash water from pavement washing, mobile cleaning, pressure wash operations at parking lots, garages, trash areas, gas station fueling areas, and sidewalk and plaza cleaning activities from polluting stormwater
Y	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs

Comments:

C.2.c. ► Bridge and Structure Maintenance and Graffiti Removal

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

Y	Control of discharges from bridge and structural maintenance activities directly over water or into storm drains
Y	Control of discharges from graffiti removal activities
Y	Proper disposal for wastes generated from bridge and structure maintenance and graffiti removal activities
Y	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs for graffiti removal
Y	Employee training on proper capture and disposal methods for wastes generated from bridge and structural maintenance and graffiti removal activities.
Y	Contract specifications requiring proper capture and disposal methods for wastes generated from bridge and structural maintenance and graffiti removal activities.

Comments:

C.2.e. ► Rural Public Works Construction and Maintenance			
Does your municipality own/maintain rural ¹ roads:		<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
If your answer is No then skip to C.2.f.			
Place a Y in the boxes next to activities where applicable BMPs were implemented. If not applicable, type NA in the box and provide an explanation in the comments section below. Place an N in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.			
<input type="checkbox"/>	Control of road-related erosion and sediment transport from road design, construction, maintenance, and repairs in rural areas		
<input type="checkbox"/>	Identification and prioritization of rural road maintenance based on soil erosion potential, slope steepness, and stream habitat resources		
<input type="checkbox"/>	No impact to creek functions including migratory fish passage during construction of roads and culverts		
<input type="checkbox"/>	Inspection of rural roads for structural integrity and prevention of impact on water quality		
<input type="checkbox"/>	Maintenance of rural roads adjacent to streams and riparian habitat to reduce erosion, replace damaging shotgun culverts and excessive erosion		
<input type="checkbox"/>	Re-grading of unpaved rural roads to slope outward where consistent with road engineering safety standards, and installation of water bars as appropriate		
<input type="checkbox"/>	Inclusion of measures to reduce erosion, provide fish passage, and maintain natural stream geomorphology when replacing culverts or design of new culverts or bridge crossings		
Comments including listing increased maintenance in priority areas:			

¹Rural means any watershed or portion thereof that is developed with large lot home-sites, such as one acre or larger, or with primarily agricultural, grazing or open space uses.

C.2.f. ► Corporation Yard BMP Implementation				
Place an X in the boxes below that apply to your corporations yard(s):				
<input type="checkbox"/>	We do not have a corporation yard			
<input type="checkbox"/>	Our corporation yard is a filed NOI facility and regulated by the California State Industrial Stormwater NPDES General Permit			
<input checked="" type="checkbox"/>	We have a Stormwater Pollution Prevention Plan (SWPPP) for the Corporation Yard(s)			
Place an X in the boxes below next to implemented SWPPP BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type NA in the box. If one or more of the BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:				
<input checked="" type="checkbox"/>	Control of pollutant discharges to storm drains such as wash waters from cleaning vehicles and equipment			
<input checked="" type="checkbox"/>	Routine inspection prior to the rainy seasons of corporation yard(s) to ensure non-stormwater discharges have not entered the storm drain system			
<input checked="" type="checkbox"/>	Containment of all vehicle and equipment wash areas through plumbing to sanitary or another collection method			
<input checked="" type="checkbox"/>	Use of dry cleanup methods when cleaning debris and spills from corporation yard(s) or collection of all wash water and disposing of wash water to sanitary or other location where it does not impact surface or groundwater when wet cleanup methods are used			
<input checked="" type="checkbox"/>	Cover and/or berm outdoor storage areas containing waste pollutants			
Comments: All areas of the Corporation Yard utilized acceptable BMPs.				
If you have a corporation yard(s) that is not an NOI facility, complete the following table for inspection results for your corporation yard(s) or attach a summary including the following information:				
Corporation Yard Name	Corp Yard Activities w/ site-specific SWPPP BMPs	Inspection Date ²	Inspection Findings/Results	Date and Description of Follow-up and/or Corrective Actions
City of South San Francisco Corporation Yard	Activities at the SSF Corp Yard with site-specific BMPs include: general housekeeping, vehicle/equipment washing;	9/22/17	All areas of the Corporation Yard utilized acceptable BMPs.	No follow-up actions required.

² Minimum inspection frequency is once a year during September.

	vehicle/equipment maintenance & repair, fuel dispensing; outdoor material storage; outdoor waste/recycling storage; municipal vehicle/heavy equipment parking; employee parking.			
--	--	--	--	--

Section 3 - Provision C.3 Reporting New Development and Redevelopment

C.3.b.iv.(2) ► Regulated Projects Reporting

Fill in attached table C.3.b.iv.(2) or attach your own table including the same information.
 See attached C.3.b.iv.(2) tables one and two.

C.3.e.iv. ► Alternative or In-Lieu Compliance with Provision C.3.c.

Is your agency choosing to require 100% LID treatment onsite for all Regulated Projects and not allow alternative compliance under Provision C.3.e.?	<input type="checkbox"/>	Yes	<input checked="" type="checkbox"/>	No
Comments (optional):				

C.3.e.v ► Special Projects Reporting

1. In FY 2017-18, has your agency received, but not yet granted final discretionary approval of, a development permit application for a project that has been identified as a potential Special Project based on criteria listed in MRP Provision C.3.e.ii.(2) for any of the three categories of Special Projects (Categories A, B or C)?	<input checked="" type="checkbox"/>	Yes	<input type="checkbox"/>	No
2. In FY 2017-18, has your agency granted final discretionary approval to a Special Project? If yes, include the project in both the C.3.b.iv.(2) Table, and the C.3.e.v. Table.	<input checked="" type="checkbox"/>	Yes	<input type="checkbox"/>	No
If you answered "Yes" to either question, 1) Complete Table C.3.e.v. 2) Attach narrative discussion of 100% LID Feasibility or Infeasibility for each project. See Table C.3.e.v. and attached narrative discussion of 100% LID Feasibility or Infeasibility for each project.				

C.3.h.v.(2) ► Reporting Newly Installed Stormwater Treatment Systems and HM Controls (Optional)

On an annual basis, before the wet season, provide a list of newly installed (installed within the reporting year) stormwater treatment systems and HM controls to the local mosquito and vector control agency and the Water Board. The list shall include the facility locations and a description of the stormwater treatment measures and HM controls installed.

See attached Table C.3.h.v.(2) for list of newly installed Stormwater Treatment Systems/HM Controls.

C.3.h.v.(3)(a) –(c) and (f) ► Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

Site Inspections Data	Number/Percentage
Total number of Regulated Projects (including offsite projects, and Regional Projects) in your agency's database or tabular format at the end of the previous fiscal year (FY16-17)	95
Total number of Regulated Projects (including offsite projects, and Regional Projects) in your agency's database or tabular format at the end of the reporting period (FY 17-18)	90
Total number of Regulated Projects (including offsite projects, and Regional Projects) for which O&M verification inspections were conducted during the reporting period (FY 17-18)	19
Percentage of the total number of Regulated Projects (including offsite projects, and Regional Projects) inspected during the reporting period (FY 17-18)	20% ³

³ Based on the number of Regulated Projects in the database or tabular format at the end of the previous fiscal year, per MRP Provision C.3.h.ii.(6)(b).

C.3.h.v.(3)(d)-(e) ► Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

Provide a discussion of the inspection findings for the year and any common problems encountered with various types of treatment systems and/or HM controls. This discussion should include a general comparison to the inspection findings from the previous year.

Summary:

The City of South San Francisco performed 19 facility O & M inspections in 2017/2018. Of the 19 inspections performed, 5 devices required maintenance. Three devices that required maintenance this FY were vault-based systems, one filter insert based system required maintenance. One vegetation-based systems required maintenance. All other systems were all in good working order. In FY 16/17, there were 5 treatment systems requiring maintenance. Overall the trend is showing that a majority of the sites are keeping up with maintenance. Overall, the majority of treatment systems are kept in good working order.

Provide a discussion of the effectiveness of the O&M Program and any proposed changes to improve the O&M Program (e.g., changes in prioritization plan or frequency of O&M inspections, other changes to improve effectiveness program).

Summary:

The City has developed a spreadsheet listing all facilities and the treatment systems associated with those facilities. At this time, the City of South San Francisco has approximately 102 locations with treatment systems installed (OR in the process of installation or are planned). The inspectors do occasionally locate additional treatment systems that are not on the spreadsheet when performing other stormwater inspections. These systems are added to the spreadsheet when they are located. Conversely, inspectors have also updated the spreadsheet based on field observations where treatment systems have not been present and/or are combined under one O&M Agreement for the property/parcel. Environmental Compliance Inspectors perform O&M inspections at least at the minimum required rate as established by the MRP. The facility list is reviewed and updated as new systems are installed and additional systems are located.

C.3.h.v.(4) ► Enforcement Response Plan

Does your agency have an Enforcement Response Plan for all O&M inspections of stormwater treatment measures?

<input checked="" type="checkbox"/>	Yes	<input type="checkbox"/>	No
-------------------------------------	-----	--------------------------	----

If No, explain:

C.3.i. ► Required Site Design Measures for Small Projects and Detached Single Family Home Projects

On an annual basis, discuss the implementation of the requirements of Provision C.3.i, including ordinance revisions, permit conditions, development of standard specifications and/or guidance materials, and staff training.

Summary:

BASMAA prepared standard specifications in four fact sheets regarding the site design measures listed in Provision C.3.i, as a resource for Permittees. We have modified local ordinances/policies/procedures and forms/checklists to require all applicable projects approved after December 1, 2012 to implement at least one of the site design measures listed in Provision C.3.i.

C.3.j.i.(5)(d) ► Green Infrastructure Outreach

On an annual basis, provide a summary of your agency's outreach and education efforts pertaining to Green Infrastructure planning and implementation.

Summary:

The City of South San Francisco provided Green Infrastructure outreach/training via a presentation to two City Council Members during a local Environmental Subcommittee Meeting held on March 13, 2017. Additionally, the City's Green Infrastructure Framework was disseminated internally to applicable departments after it was approved by City Council in June 2018.

The City also holds a quarterly MRP Compliance Meeting involving the Public Works Director, Engineering, Parks and ECD, where Green Infrastructure is always on the agenda and requirements and potential projects are discussed.

Please refer to the SMCWPPP FY 17-18 Annual Report for a summary of outreach efforts implemented at the countywide level.

C.3.j.ii.(2) ► Early Implementation of Green Infrastructure Projects

On an annual basis, submit a list of green infrastructure projects, public and private, that are already planned for implementation during the permit term and infrastructure projects planned for implementation during the permit term that have potential for green infrastructure measures. Include the following information:

- A summary of planning or implementation status for each public and private green infrastructure project that is not also a Regulated Project as defined in Provision C.3.b.ii. (see C.3.j.ii.(2) Table B - Planned Green Infrastructure Projects).
- A summary of how each public infrastructure project with green infrastructure potential will include green infrastructure measures to the maximum extent practicable during the permit term. For any public infrastructure project where implementation of green infrastructure measures is not practicable, submit a brief description of the project and the reasons green infrastructure measures were impracticable to implement (see C.3.j.ii.(2) Table A - Public Projects Reviewed for Green Infrastructure).

Background Information:

Describe how this provision is being implemented by your agency, including the process used by your agency to identify projects with potential for green infrastructure, if applicable.

City staff attended the SMCWPPP C.3 New Development Workshop on June 14, 2016, where early GI identification and implementation was presented, based in part on BASMAA's "Guidance for Identifying Green Infrastructure Potential in Municipal Capital Improvement Program Projects." This guidance is incorporated into the City's Green Infrastructure Framework as noted below.

In February 2016, the City of SSF convened a Green Infrastructure Planning Study and Group. The group consisted of representatives from Environmental Compliance, Engineering, Planning and an outside consultant that will be developing the City's long-term GI strategy. This group has continued to work to identify potential GI projects through the Plan Review and Building Plan Review process. The group will be expanding its scope and meeting more frequently in FY 18-19.

Larry Walker and Associates developed a regional GI framework for the San Mateo Countywide Pollution Prevention Program and was contracted to assist municipalities in making them city-specific. The City of SSF contracted with consultant Schaaf and Wheeler to incorporate this template into a specific City Green Infrastructure Plan Framework, including project identification procedures, which was approved by the City Council on June 27, 2017.

The City is currently compiling a Green Infrastructure Plan incorporating the BASMAA/SMCWPPP guidance documents with assistance from Schaaf and Wheeler, to be approved by City Council prior to 6/30/19.

Summary of Planning or Implementation Status of Identified Projects:

See attached Table C.3.j.ii.(2)-A for Public Projects Reviewed for Green Infrastructure within the City of SSF.

C.3.j.iii.(2) ► Participate in Processes to Promote Green Infrastructure

On an annual basis, report on the goals and outcomes during the reporting year of work undertaken to participate in processes to promote green infrastructure.

Please refer to the SMCWPPP FY 17-18 Annual Report for a summary of efforts conducted to help regional, State, and federal agencies plan, design and fund incorporation of green infrastructure measures into local infrastructure projects, including transportation projects.

C.3.j.iv.(2) ► Tracking and Reporting Progress

On an annual basis, report progress on development and implementation of methods to track and report implementation of green infrastructure measures and provide reasonable assurance that wasteload allocations for TMDLs are being met.

Please refer to the SMCWPPP FY 17-18 Annual Report for a summary of methods being developed to track and report implementation of green infrastructure measures.

C.3.b.iv.(2) ► Regulated Projects Reporting Table (part 1) – Projects Approved During the Fiscal Year Reporting Period

Project Name Project No.	Project Location ⁴ , Street Address	Name of Developer	Project Phase No. ⁵	Project Type & Description ⁶	Project Watershed ⁷	Total Site Area (Acres)	Total Area of Land Disturbed (Acres)	Total New Impervious Surface Area (ft ²) ⁸	Total Replaced Impervious Surface Area (ft ²) ⁹	Total Pre- Project Impervious Surface Area ¹⁰ (ft ²)	Total Post- Project Impervious Surface Area ¹¹ (ft ²)
Private Projects											
ARE 279 & 283 East Grand Avenue B17-1149, B17-1017 & B17-1165	279 & 283 East Grand Avenue	Alexandria Real Estate Equity	4	Final phase (Phase 4) of the ARE East Grand Avenue Project. 5-story R&D Building (279 E. Grand Ave) and a separate parking structure (283 E. Grand Ave)	Colma Creek/ San Francisco Bay	5.61	3.95	18006	129091	195577	193837

Home 2 Suites B17-1420	550 Gateway Blvd.	Sri Krishna Enterprises	1	93,320 SF Hotel Building with 151 rooms. Building will have 5 stories with 137 uncovered parking stalls	Colma Creek/ San Francisco Bay	2	1.85	67990	0	2847	70837
150 Airport Blvd. B17-0788	150 Airport Blvd.	150 Airport Blvd. SSF, LLC	1	7-story residential development (5 levels of Type III residential over 2	Colma Creek/ San Francisco Bay	1.58	1.58	22425	35830	42025	58255

⁴Include cross streets

⁵If a project is being constructed in phases, indicate the phase number and use a separate row entry for each phase. If not, enter "NA".

⁶Project Type is the type of development (i.e., new and/or redevelopment). Example descriptions of development are: 5-story office building, residential with 160 single-family homes with five 4-story buildings to contain 200 condominiums, 100 unit 2-story shopping mall, mixed use retail and residential development (apartments), industrial warehouse.

⁷State the watershed(s) in which the Regulated Project is located. Downstream watershed(s) may be included, but this is optional.

⁸All impervious surfaces added to any area of the site that was previously existing pervious surface.

⁹All impervious surfaces added to any area of the site that was previously existing impervious surface.

¹⁰For redevelopment projects, state the pre-project impervious surface area.

¹¹For redevelopment projects, state the post-project impervious surface area.

C.3.b.iv.(2) ► Regulated Projects Reporting Table (part 1) – Projects Approved During the Fiscal Year Reporting Period

Project Name Project No.	Project Location ⁴ , Street Address	Name of Developer	Project Phase No. ⁵	Project Type & Description ⁶	Project Watershed ⁷	Total Site Area (Acres)	Total Area of Land Disturbed (Acres)	Total New Impervious Surface Area (ft ²) ⁸	Total Replaced Impervious Surface Area (ft ²) ⁹	Total Pre- Project Impervious Surface Area ¹⁰ (ft ²)	Total Post- Project Impervious Surface Area ¹¹ (ft ²)

²⁴For public projects, enter the plans and specifications approval date.

²⁵List source control measures approved for the project. Examples include: properly designed trash storage areas; storm drain stenciling or signage; efficient landscape irrigation systems; etc.

²⁶List site design measures approved for the project. Examples include: minimize impervious surfaces; conserve natural areas, including existing trees or other vegetation, and soils; construct sidewalks, walkways, and/or patios with permeable surfaces, etc.

²⁷List all approved stormwater treatment system(s) to be installed onsite or at a joint stormwater treatment facility (e.g., flow through planter, bioretention facility, infiltration basin, etc.).

²⁸List the legal mechanism(s) (e.g., maintenance plan for O&M by public entity, etc.) that have been or will be used to assign responsibility for the maintenance of the post-construction stormwater treatment systems.

²⁹See Provision C.3.d.i. "Numeric Sizing Criteria for Stormwater Treatment Systems" for list of hydraulic sizing design criteria. Enter the corresponding provision number of the appropriate criterion (i.e., 1.a., 1.b., 2.a., 2.b., 2.c., or 3).

³⁰For Alternative Compliance at an offsite location in accordance with Provision C.3.e.i.(1), on a separate page, give a discussion of the alternative compliance site including the information specified in Provision C.3.b.v.(1)(m)(i) for the offsite project.

³¹For Alternative Compliance by paying in-lieu fees in accordance with Provision C.3.e.i.(2), on a separate page, provide the information specified in Provision C.3.b.v.(1)(m)(ii) for the Regional Project.

³²Note whether a third party was used to certify the project design complies with Provision C.3.d.

³³If HM control is not required, state why not.

³⁴If HM control is required, state control method used (e.g., method to design and size device(s) or method(s) used to meet the HM Standard, and description of device(s) or method(s) used, such as detention basin(s), bioretention unit(s), regional detention basin, or in-stream control).

C.3.h.v.(2). ► Table of Newly Installed³⁵ Stormwater Treatment Systems and Hydromodification Management (HM) Controls (Optional)

Fill in table below or attach your own table including the same information.

Name of Facility	Address of Facility	Party Responsible ³⁶ For Maintenance	Type of Treatment/HM Control(s)
Pinefino LLC	211 Airport Blvd.	Pinefino LLC (Edwin Lan)	Bioretention Area Media Filter
Genentech Childcare Center	342 Allerton Avenue	Genentech, Inc.	Bioretention Areas (5) Flow-through Planters (2) Permeable Pavement
Costco Business Center	900 Dubuque Avenue	Michael Okuma	Bioretention Areas (4) Drain Inserts
AC Hotel	1333 Veterans Blvd.	Charles King	Bioretention Area

³⁵ "Newly Installed" includes those facilities for which the final installation inspection was performed during this reporting year.

³⁶ State the responsible operator for installed stormwater treatment systems and HM controls.

Special Projects Narrative

150 Airport Boulevard

150 Airport Blvd.

Project (residential) was approved January 2017. Building Permit was applied for on May 18, 2017 and Building Permit issued February 13, 2018. Proposed building is zero lot-line and majority of the site will be covered by the building footprint or the Baden Avenue extension. The project will be within ¼ mile of a transit hub, there will be a Density of >100 DU/ac.

There will be no surface parking.

This project will have a media filter. Media filter will meet the specifications of the Western Washington Technical Assessment Protocol-Ecology (TAPE) program and Municipal regional permit requirements for NON-LID measures.

1. Feasibility/Infeasibility of Onsite LID Treatment

The project site was reviewed with regard to the feasibility and infeasibility of onsite LID treatment. The results of this review showed that it was infeasible to treat 100% percent of the C.3.d amount of runoff with LID treatment. The findings of this review are presented below.

- a. **On-site Drainage Conditions.** The proposed site includes a seven-level multi-family residential building with 157 units and 2 levels of parking. The development is divided into two drainage management areas;
 - i. Drainage Management Area 1 mainly consists of the building roof and the courtyard located on the 3rd floor of the building. All storm waters will be collected and treated with a media filter. From the media filter, the treated storm waters exit into an existing catch basin adjacent to the sidewalk on Airport Blvd.
 - ii. Drainage Management Area 2 consists of the building roof, courtyard and the new Baden Avenue extension. All storm waters will be collected and treated with a media filter. From the media filter, the treated storm waters will discharge into a proposed 12-inch main located on Airport Blvd.
- b. **Constraints to Providing On-site LID.** The drainage management areas that are proposed to drain to tree-box type high flow rate biofilters and/or vault-based high flow rate media filters include some areas that are not covered by buildings. There are some proposed strips of planting areas located adjacent to the building. However, a majority of the site will be covered by the

building or Baden Avenue extension. In these areas, conditions and technical constraints are present that preclude the use of LID features and facilities, as described below.

1. Impervious paved areas: The existing project site is approximately 68,825 square feet (SF). As part of the project, we will be proposing a residential multi-family unit building. The proposed building is a zero lot line and the Baden Avenue extension is a requirement as it was a Condition of Approval for the project. As a result, the project site presents too many site constraints to provide adequate space for LID treatment measures.
2. Landscaped areas: These areas are of inadequate size to accommodate bio treatment facilities that meet the sizing requirements for the tributary area.

2. Feasibility/Infeasibility of Off-Site LID Treatment. The possibility of providing off-site LID treatment was found to be infeasible for the following reasons.

- a. No additional property within the same watershed is owned by the project proponent. LID treatment in the right of way adjacent to the project is infeasible for the following reasons:
 - i. Inadequate size to accommodate bio treatment facilities that meet sizing requirements for the tributary area.
 - ii. Additional purchased land will be used for the Baden Avenue extension as part of the project Conditions of Approval.
 - iii. Conflict exists with the public sidewalk, due in part to City's right of way policies and procedures.
- b. There is no regional LID stormwater mitigation program available to the project for in-lieu C.3 compliance.

3. Feasibility/Infeasibility of combination of On-site and Off-site LID Treatment.

Due to the reasons outlined above, the possibility of providing a combination of on and off-site LID treatment was found to be infeasible.

Summerhill Homes

988 El Camino Real

Project (mixed-use) was approved by the Planning Commission on February 28, 2018. Building Permit has not yet been applied for.

Proposed building is located within the El Camino Real/Chestnut Avenue Area Plan.

The project will be 100% located within a planned PDA and there will be a Density of >100 DU/ac.

This project proposes a media filter and flow-through planter. Media filter will meet the specifications of the Western Washington Technical Assessment Protocol-Ecology (TAPE) program and Municipal regional permit requirements for NON-LID measures.

1. Feasibility/Infeasibility of Onsite LID Treatment

The project site was reviewed with regard to the feasibility and infeasibility of onsite LID treatment. The results of this review showed that it was infeasible to treat 45% percent of the C.3.d amount of runoff with LID treatment. The findings of this review are presented below.

- a. **On-site Drainage Conditions.** In the existing condition, the majority of the site directs flow towards the Centennial Way Trail and 12 Mile Creek by way of overland flow. There is one existing field inlet on the site that collects a portion of the impervious area and conveys stormwater to an existing pipe in El Camino Real. In the proposed condition, this project will hold a 47,100 square foot building and related amenities. Portions of the roof runoff will be collected into three flow-through planters located in the structure. The remaining roof runoff will be routed to a media filter vault. Runoff from the pavement s and landscaped areas surrounding the building will also be collected and discharged to the same media filter vault. Each treatment measure then discharges stormwater to the existing system in Chestnut Avenue. The Chestnut Avenue system conveys flow across the Centennial Way Trail parcel to the 12 Mile Creek.
- b. **Self-treating and Self-retaining Areas and LID Treatment Measures.** The proposed project does not have any self-treating or self-retaining areas due to grading constraint. However, there are three LID treatment measures on the site. As mentioned in the previous section, there are three flow-through planters located on the building structure. Two areas of the building have a roof at the first-story level, designated on the plans as a pool deck and a courtyard. The flow-through planters are incorporated into the landscape design for the pool deck and courtyard. Downspouts from the upper level roofs will direct drainage to the planters.
- c. **Maximizing Flow to LID Features and Facilities.** Drainage to the LID features has been optimized by coordinating the roof and downspout design with the flow-through planter locations. This project utilizes flat roof s, which allow for more flexibility than pitched roofs when designing downspout routing. In addition, the architect has incorporated variations in parapet heights to facilitate drainage across long distances of flat roof. The three flow-through planters are spaced out, rather than clustered together, to provide a simpler routing for downspouts to convey runoff from adjacent roofs. The total result maximizes the amount of roof runoff directed to LID treatment.

d. **Constraints to Providing On-site LID.** The drainage management areas that are proposed to drain to tree-box type high flow rate biofilters and/or vault-based high flow rate media filters include some areas that are not covered by buildings. These areas include: the frontages along El Camino Real and Chestnut Avenue, between the buildings and public realm; the area of the 50' PG&E gas easement; and all other smaller at-grade areas between the building and property line. In these areas, conditions and technical constraints are present that preclude the use of LID features and facilities, as described below.

- i. **Impervious paved areas:** Impervious paved areas are located along the street frontage and around the building. The majority of the street frontage from the public realm to the building face is impervious concrete sidewalk. The wide sidewalk is part of the City's El Camino Real/Chestnut Avenue Area Plan, designed to encourage pedestrian traffic over vehicular traffic. Around the building, impervious footpaths function as walkways from building egress points. The footpaths also increase pedestrian circulation around the area and to the Centennial Way Trail, another key goal of the Area Plan. The other impervious paved area is a portion of at-grade surface parking protruding out from the covered garage parking. Due to the fact that these areas are at grade and the project storm drain connection is relatively shallow, LID treatment measures are infeasible.

Adding to this is the lack of physical space to incorporate LID treatment at grade. The project site is 1.67 acres with a building footprint of 1.08 acres and a PG&E gas easement covering 0.32 acres. Because it is impractical to construct LID facilities within the gas easement, this leaves 0.27 acres, or roughly 11,800 square feet of potential open area. However, approximately 8,000 square feet of this potential open area consists of the street frontage and footpaths previously discussed. The remaining 3,800 square feet are landscaped areas, but the conditions restricting LID application for these areas are discussed in the following section.

- ii. **Landscaped areas:**
 - **Slopes are too steep to terrace:** In some locations, the slope of the landscaped area is too steep to feasibly provide LID treatment. This occurs specifically at the north corner of the site where the landscaped area slopes down to the property line to match the existing grade of the adjacent parcel.
 - **Conflict with subsurface utilities:** As previously mentioned, a PG&E gas line easement covers 0.32 acres of the site. The easement deed restricts the construction of any "reservoir" within the easement area. Given that LID facilities are designed to collect and detain stormwater, such construction would go against the deed restriction. Even without the explicit restriction, the required size and depth for LID facilities would impede construction in the

easement area since the gas line itself is a 30" transmission main. Subsurface construction in the area is restricted in the interest of public safety.

- Lack of head or routing path to move collected runoff to the landscaped area or from the landscaped area to a disposal point: Some landscape portions of the site are too remote and there is no feasible routing path to connect drainage. This occurs specifically near the southeast property line. A potential storm drain pipe in this area would be blocked by an existing sewer lateral and storm drain culvert on one side, and the existing gas line on the other side. The existing utilities on both sides of the area prohibit the installation of new utilities.
- El Camino Real/Chestnut Avenue Area Plan: The current draft of the Area Plan has specific requirements for the development of this block that indirectly limit the amount of landscape on the site. Intended to be a mixed use commercial and high-density residential area, the Area Plan has this block slated for a residential density of 71 DU/acre and a FAR of 2.5. Such requirements result in a large building footprint and leave little room for landscaping outside of the gas easement. The Area Plan essentially confirms this project as a Category C, C.3 Special Project.

2. Feasibility/Infeasibility of Off-Site LID Treatment. The possibility of providing off-site LID treatment was found to be infeasible for the following reasons.

- a. Summerhill Homes does not currently control land within the same watershed that can accommodate bioretention facilities adequately sized to treat runoff from 988 el Camino Real.
- b. Currently, there is no regional LID stormwater mitigation program available to the project for in-lieu C.3 compliance.

• **Feasibility/Infeasibility of combination of On-site and Off-site LID Treatment.**

Due to the reasons outlined above, the possibility of providing a combination of on and off-site LID treatment was found to be infeasible.

201 Grand Avenue

201 Grand Avenue

Project (mixed use) applied for a Planning Use Permit in March 2015. Building Permit was applied for on July 13, 2018 and Building Permit is currently pending approval.

Proposed project will cover majority of lot with remaining portion consisting of one-way drive isle.

The project is < ½ acre, and will be located within the centralized business district with a Density of >100 DU/ac.

There will be no surface parking.

This project will have a media filter treating 74% of site and proposed flow-through planters. Media filter will meet the specifications of the Western Washington Technical Assessment Protocol-Ecology (TAPE) program and Municipal regional permit requirements for NON-LID measures.

1. Feasibility/Infeasibility of Onsite LID Treatment

The project site was reviewed with regard to the feasibility and infeasibility of onsite LID treatment. The results of this review showed that it was infeasible to treat 100% percent of the C.3.d amount of runoff with LID treatment. The findings of this review are presented below.

- a. **On-site Drainage Conditions.** The project proposes to construct a zero lot line structure which will occupy the entire lot. Drainage will be handled via roof drains, downspouts, planter drains and floor drains connected to the building plumbing system. The building plumbing system will be connected to a media filter before discharging to the city's storm drain system.
- b. **Self-Treating, Self-Retaining and LID Treatment Measures.** The podium style building will allow for treatment via flow-through planters on the interior podium level. A portion of the interior roof will be directed to flow-through planters.
- c. **Maximizing Flow to LID Features and Facilities.** The flow-through planters were positioned adjacent to building walls where downspouts can be directed and the tributary areas were maximized keeping with the building heights and plumbing code requirements.
- d. **Constraints to Providing On-site LID Treatment Measures.** Because of the zero lot line type of project, Self-Treating, Self-Retaining and LID Treatment Measures will be infeasible to provide 100% of the LID treatment requirements. The podium style building will allow for treatment via flow-through planters on the interior podium level. However, much of the roof along the perimeter of

the building and podium deck cannot be routed to the flow-through planters due to height restrictions and plumbing constraints.

2. Feasibility/Infeasibility of Off-Site LID Treatment. The possibility of providing off-site LID treatment was found to be infeasible for the following reasons.

- a. The owner does not own or otherwise control land within the same watershed of the project that can accommodate in perpetuity off-site bioretention facilities adequately sized to treat the runoff volume of the primary project.
- b. There is no regional LID stormwater mitigation program available to the project for in-lieu C.3 compliance.

3. Feasibility/Infeasibility of combination of On-site and Off-site LID Treatment. Due to the reasons outlined above, the possibility of providing a combination of on and off-site LID treatment was found to be infeasible.

418 Linden Avenue

418 Linden Avenue

Project (residential) applied for a Planning Use Permit in March 2015. Building Permit was applied for on July 13, 2018 and Building Permit is currently pending approval.

The project will be located within ¼ mile of a transit hub with a Density of >100 DU/ac.

There will be no surface parking.

This project will have a media filter treating 45% of site and proposed bioretention area. Media filter will meet the specifications of the Western Washington Technical Assessment Protocol-Ecology (TAPE) program and Municipal regional permit requirements for NON-LID measures.

1. Feasibility/Infeasibility of Onsite LID Treatment

The project site was reviewed with regard to the feasibility and infeasibility of onsite LID treatment. The results of this review showed that it was infeasible to treat 100% percent of the C.3.d amount of runoff with LID treatment. The findings of this review are presented below.

- a. **On-site Drainage Conditions.** The project proposes to construct a building covering a majority of the lot with the remaining portion consisting of a one way drive aisle. Building drainage will be handled via roof drains, downspouts, planter drains and floor drains connected to the building plumbing system. The building plumbing system will be connected to a media filter which is then connected to an onsite drain system before discharging to the city's storm drain system. Drive aisle will be sheet flow to a bioretention area along the property line. The bioretention area will drain to the onsite drain system downstream of the media filter and discharge to the city's storm drain system.

- b. **Self-Treating, Self-Retaining and LID Treatment Measures.** Self-treating planters are proposed on the Level 5 roof deck. A bioretention area is proposed on the ground level adjacent to the drive aisle.
- c. **Maximizing Flow to LID Features and Facilities.** The bioretention area was positioned adjacent to the property line. Stormwater runoff from adjacent drive aisle will sheet flow to the bioretention area.
- d. **Constraints to Providing On-site LID Treatment Measures.** Because of the limited space onsite, Self-Treating, Self-Retaining and LID Treatment Measures will be infeasible to provide 100% of the LID treatment requirements. The wood frame building with a roof deck on Level 5 will not accommodate flow-through planters due to structural limitations. Permeable paving was contemplated but deemed infeasible due to heavy vehicular load (delivery trucks) and high traffic use of the drive aisle.

2. Feasibility/Infeasibility of Off-Site LID Treatment. The possibility of providing off-site LID treatment was found to be infeasible for the following reasons.

- c. The owner does not own or otherwise control land within the same watershed of the project that can accommodate in perpetuity off-site bioretention facilities adequately sized to treat the runoff volume of the primary project.
- d. There is no regional LID stormwater mitigation program available to the project for in-lieu C.3 compliance.

3. Feasibility/Infeasibility of combination of On-site and Off-site LID Treatment. Due to the reasons outlined above, the possibility of providing a combination of on and off-site LID treatment was found to be infeasible.

200 Linden Avenue

200 Linden Avenue

Project (mixed use) was approved by the Planning Commission August 2017. Building Permit was applied for on March 1, 2018 and Building Permit approval is currently pending.

Proposed building is zero lot-line.

The project will be located within a central business district with a Density of >50 DU/ac.

There will be no surface parking.

This project will have a media filter. Media filter will meet the specifications of the Western Washington Technical Assessment Protocol-Ecology (TAPE) program and Municipal regional permit requirements for NON-LID measures.

1. Feasibility/Infeasibility of Onsite LID Treatment

The project site was reviewed with regard to the feasibility and infeasibility of onsite LID treatment. The results of this review showed that it was infeasible to treat 100% percent of the C.3.d amount of runoff with LID treatment. The findings of this review are presented below.

- a. **On-site Drainage Conditions.** The proposed project will include a zero lot line building containing retail on the ground floor, 97 residential units above and 3 levels of parking. The proposed development is divided into one drainage management area.
 - i. Drainage Management Area consists of the building. All storm waters will be collected by roof drains and sent to the ground floor parking to be treated with a media filter. From the media filter, the treated storm waters will be pumped out through a 4" force main that connects to a storm main on Linden Avenue.

- b. **Constraints to Providing On-site LID.** The drainage management area is taken up 100% by the building.
 - i. Impervious paved areas: The existing project site is approximately 31,500 SF. As part of the project, we will be proposing a mixed use building. The proposed building is zero lot line construction. As a result, the project site is 100% covered by the building.
 1. Inadequate size to accommodate bio treatment facilities that meet sizing requirements for the tributary area.

2. Feasibility/Infeasibility of Off-Site LID Treatment. The possibility of providing off-site LID treatment was found to be infeasible for the following reasons.

- a. No additional property within the same watershed is owned by the project proponent. LID treatment in the right of way adjacent to the project is infeasible for the following reasons:
 - j. Inadequate size to accommodate bio treatment facilities that meet sizing requirements for the tributary area.
 - ii. Conflict with public sidewalk.
 - iii. Existing public utilities conflict.

- b. There is no regional LID stormwater mitigation program available to the project for in-lieu C.3 compliance.

3. Feasibility/Infeasibility of combination of On-site and Off-site LID Treatment.

Due to the reasons outlined above, the possibility of providing a combination of on and off-site LID treatment was found to be infeasible.

C.3.j.ii.(2) ► Table A - Public Projects Reviewed for Green Infrastructure				
Project Name and Location⁴⁴	Project Description	Status⁴⁵	GI Included?⁴⁶	Description of GI Measures Considered and/or Proposed or Why GI is Impracticable to Implement⁴⁷
SSF Grand Boulevard Initiative	Pedestrian and driving improvements on El Camino Real between McLellan Drive and Westborough Blvd.	Beginning planning and design phase	Yes	Engineering Dept. to consider applicable GI measures when/if street modifications are incorporated.
Sewer Replacement Project (Throughout SSF)	Sewer Rehabilitation	4-year project, ongoing	TBD	Engineering Dept. to consider applicable GI measures when/if street modifications are incorporated.
Underground Electrical Replacement Project (Spruce Ave b/w Parkway Ave and Railroad Ave)	Moving electrical services underground	Beginning planning and design phase	TBD	Engineering Dept. to consider applicable GI measures when/if street modifications are incorporated.
SSF Caltrain Station and Plaza (Grand Ave and Airport Blvd)	Move existing Caltrain station closer to SSF downtown area and incorporate plaza	Planning and design phase	TBD	Specific details on GI not yet available, as project is in early planning/design stage.
SSF City Services Facility (El Camino Real and Chestnut Ave)	New facility/campus featuring Police Station, Parks & Rec HQ and Library	Beginning planning and design phase	TBD	Specific details on GI not yet available, as project is in early planning stage.
Grand Avenue Improvement Project (Grand Ave b/w Linden Ave and Airport Blvd)	Green street improvements along Grand Ave and Linden in main downtown commercial area	Design concept generated (through SMCWPPP regional consultant)	Yes	Curb extensions proposed as primary stormwater treatment approach. Project not yet in development due to funding and current prioritization of Orange Memorial Park Project.
Linden Avenue Complete Streets (Linden Ave from California St to Aspen St)	Pedestrian and Bike Lane improvements	Beginning planning and design phase	TBD	Potential LID incorporated into design. Details not yet available as project is in very early planning stage.

⁴⁴ List each public project that is going through your agency's process for identifying projects with green infrastructure potential.

⁴⁵ Indicate status of project, such as: beginning design, under design (or X% design), projected completion date, completed final design date, etc.

⁴⁶ Enter "Yes" if project will include GI measures, "No" if GI measures are impracticable to implement, or "TBD" if this has not yet been determined.

⁴⁷ Provide a summary of how each public infrastructure project with green infrastructure potential will include green infrastructure measures to the maximum extent practicable during the permit term. If review of the project indicates that implementation of green infrastructure measures is not practicable, provide the reasons why green infrastructure measures are impracticable to implement.

C.3.j.ii.(2) ► Table B - Planned and/or Completed Green Infrastructure Projects

Project Name and Location ⁴⁸	Project Description	Planning or Implementation Status	Green Infrastructure Measures Included
Orange Memorial Park Stormwater Capture Project (Regional)	Installation of two subsurface infiltration chambers for capture/treatment of large portion of upper Colma Creek watershed.	Design concept generated (through SMCWPPP regional consultant). Consultants selected by City via RFP in 2018. Currently in early design phase.	Infiltration chambers and hydrodynamic separator. Potential LID incorporated within adjacent parking lots. Project may also provide beneficial flood alleviation and groundwater recharge.

⁴⁸ List each planned (and expected to be funded) public and private green infrastructure project that is not also a Regulated Project as defined in Provision C.3.b.ii. Note that funding for green infrastructure components may be anticipated but is not guaranteed to be available or sufficient.

Section 4 – Provision C.4 Industrial and Commercial Site Controls

Program Highlights and Evaluation

Highlight/summarize activities for reporting year:

Summary:

Each year, the business inspection plan and enforcement response plan (ERP) are reviewed to make sure that they continue to meet the needs of the industrial and commercial inspection program. The business inspection plan was last updated June 1, 2017 and the ERP was updated June 13, 2017.

The facilities list is reviewed to determine the inspection frequencies and priorities for the coming fiscal year. The facility spreadsheet is updated as needed. A list of facilities to be inspected for the next fiscal year is generated between June and August. Inspectors work from this spreadsheet and inspection information for the businesses is inserted as they are inspected. A master inspection spreadsheet is also updated after each inspection or at the end of each day. The findings of each inspection are summarized on the spreadsheet. More details are included on the inspection forms. Follow-up inspections are performed as needed.

Environmental Compliance Supervisor Andrew Wemmer and Senior Inspector Daniel Garza participated in the CII Subcommittee in FY 17-18.

Inspectors attend trainings as they are offered on a countywide/regional basis.

The four (4) current Environmental Compliance Inspectors received training on the updated Stormwater Enforcement Response Plan on June 21, 2017.

Refer to the C.4. Industrial and Commercial Site Controls section of the SMCWPPP FY 17-18 Annual Report for a description of countywide activities.

C.4.b.iii ► Potential Facilities List (i.e., List of All Facilities Requiring Stormwater Inspections)

List below or attach your list of industrial and commercial facilities in your Inspection Plan to inspect that could reasonably be considered to cause or contribute to pollution of stormwater runoff.

Please see Attachment A for a list of industrial and commercial facilities in the City of South San Francisco's Inspection Plan to inspect that could reasonably be considered to cause or contribute to pollution of stormwater runoff.

C.4.d.iii.(2)(a) & (c) ▶ Facility Inspections	
Fill out the following table or attach a summary of the following information. Indicate your reporting methodology below.	
<input checked="" type="checkbox"/>	Permittee reports multiple discrete potential and actual discharges as one enforcement action.
<input type="checkbox"/>	Permittee reports the total number of discrete potential and actual discharges on each site.
	Number
Total number of inspections conducted (C.4.d.iii.(2)(a))	227
Violations, enforcement actions, or discreet number of potential and actual discharges resolved within 10 working days or otherwise deemed resolved in a longer but still timely manner (C.4.d.iii.(2)(c))	35
Comments: Any violation not resolved at the time of a follow-up inspection is considered to be part of the original violation, so is not counted separately. All violations were resolved within 10 days or otherwise deemed resolved in a longer but still timely manner. The City issues Administrative Citations with accompanying Notices of Violation (NOV); therefore although there were 35 violations noted above, two of the violations were subject to Administrative Citations as well as NOVs – resulting in a total of 37 enforcement actions in the table below.	

C.4.d.iii.(2)(b) ▶ Frequency and Type of Enforcement Conducted		
Fill out the following table or attach a summary of the following information.		
	Enforcement Action (as listed in ERP) ⁴⁹	Number of Enforcement Actions Taken
Level 1	Verbal Warnings/Warning Letters/NOVs	35
Level 2	Administrative Citation	2
Level 3	Compliance Meeting/Cease & Desist Order/Notice to Abate/Stop Work Order	0
Level 4	Criminal Penalties/Civil Injunctions	0
Total		37

⁴⁹Agencies to list specific enforcement actions as defined in their ERPs.

C.4.d.iii.(2)(d) ▶ Frequency of Potential and Actual Non-stormwater Discharges by Business Category

Fill out the following table or attach a summary of the following information.

Business Category ⁵⁰	Number of Actual Discharges	Number of Potential Discharges
Restaurants/Food Service Facilities	1	8
Hotels	0	2
Auto Repair	2	5
All Others	0	17

C.4.d.iii.(2)(e) ▶ Non-Filers

List below or attach a list of the facilities required to have coverage under the Industrial General Permit but have not filed for coverage:

While conducting routine stormwater inspections in the field, the following facility was noted as possibly required to have Industrial General Permit Coverage:

Loop Transportation (Bus Service/Repair Yard) located at 54 Tanforan Avenue, south San Francisco, CA 94080.

C.4.e.iii ▶ Staff Training Summary

Training Name	Training Dates	Topics Covered	No. of Industrial/ Commercial Site Inspectors in Attendance	Percent of Industrial/ Commercial Site Inspectors in Attendance	No. of IDDE Inspectors in Attendance	Percent of IDDE Inspectors in Attendance
SMCWPPP Commercial/Industrial Stormwater Inspection Workshop	2/28/18	Facility Stormwater Inspection Basics, Shared Trash Enclosure inspections, Auto Repair Shop inspections, Large Retail Facility inspections, Mobile Business inspections (C4 or C5)	4	100%	4	100%
NSC Certified Stormwater Inspector Training	3/12-3/13/18	Stormwater Permit Compliance including: Inspections (Industry, Construction, Commercial, Municipal); Annual Reports; Stormwater Visual Observations; Elimination of Non Stormwater Discharges; Public Information and Education and Outreach; Document Control; Audits;	2	50%	2	50%

⁵⁰List your Program's standard business categories.

		Illicit Discharge Detection & Elimination				
CWEA Annual Conference	4/18-4/20/18	Stormwater Industrial General Permit, State and Regional Waterboard regulations for cannabis cultivation, I&I Reduction/inspection	1	25%	1	25%
CWEA P3S Conference	2/11-2/14/18	Industrial General Permit Inspection Training, Case Studies, Electronic dta tracking and reporting	1	25%	1	25%

Comments:

The City of South San Francisco employs up to 4 Inspectors, all of which perform the duties of both Industrial/Commercial Site Inspections and IDDE Inspections. Total number of Inspectors varied in FY 2017-2018 due to resignation and recruitment activities.

Section 5 – Provision C.5 Illicit Discharge Detection and Elimination

Program Highlights and Evaluation

Highlight/summarize activities for reporting year:

Provide background information, highlights, trends, etc.

Summary:

- 1) The City of South San Francisco has an ongoing program for reporting illicit discharges within the City. When the street crew observes an illicit discharge or a suspected illicit discharge in the course of performing regularly scheduled maintenance, they call on the Environmental Compliance Inspectors to investigate. Additionally, Inspectors participate in a quarterly creek walk along Colma Creek with County of San Mateo staff, enabling Inspectors to identify problem areas containing evidence of past discharges. Residents of South San Francisco also call the Street Department or the WQCP to report illicit discharges/potential discharges. Additionally, the Public Works Department offers the SeeClickFix mobile application, allowing residents and citizens to report various issues in the service area, including illicit stormwater discharges. Responses and communication are tracked electronically.
 The WQCP maintains a stormwater hotline for residents to report suspected illicit discharges. The hotline is publicized on the City’s website, and is printed on outreach materials such as brochures, reusable shopping bags, sponges, pencils, erasers and more. The Inspectors receive and follow up on these reports as well.
 Illicit Discharge Inspections and Responses are tracked via tracking table.
 The Enforcement Response Plan (ERP) was updated on June 21, 2017.
- 2) Senior Environmental Compliance Inspector Daniel Garza participated in the CII Subcommittee in FY 17-18.
- 3) Refer to the C.5 Illicit Discharge Detection and Elimination section of the SMCWPPP FY 17-18 Annual Report for description of activities at the countywide or regional level.
- 4) The IDDE Tacking Table was updated to include information on Mobile Businesses.

C.5.c.iii ► Complaint and Spill Response Phone Number

Summary of any changes made during FY 17-18:

No Change.

C.5.d.iii.(1), (2), (3) ► Spill and Discharge Complaint Tracking

Spill and Discharge Complaint Tracking (fill out the following table or include an attachment of the following information)

	Number
Discharges reported (C.5.d.iii.(1))	40
Discharges reaching storm drains and/or receiving waters (C.5.d.iii.(2))	24

Discharges resolved in a timely manner (C.5.d.iii.(3))	40
<p>Comments:</p> <p>Illicit discharges are discovered in the course of routine surveillance, in response to calls to the stormwater hotline, reports from the Public Works Department Street Crew and citizen reports via the SeeClickFix application (app). All tabulated discharges were reported on illicit discharge forms completed by WQCP staff. In some cases, a discharge may have reached the storm drain system, but was recovered by the street crew. Such discharges were not included in the number of discharges reaching storm drains and/or receiving water. If multiple types of discharges are observed at a location on the same report form they are counted as one discharge for the purpose of reporting in the tracking table above. The City had 40 separate discharge complaints with 12 different types of pollutants in those complaints. 22 Notices of Violation (NOVs) and 11 Administrative Citations were issued in response to the Illicit Discharges reported above.</p> <p>All reported discharges were resolved in a timely manner.</p> <p>If the City receives a complaint on either the hotline or through other channels, inspectors will go into the field and verify the claim of a discharge. All but 3 of the reported discharges were substantiated in the field. 60% of the discharges reached the storm drain. For the remaining 40% of the discharges there was no clear evidence that the discharge reached the storm drain.</p>	

Section 6 – Provision C.6 Construction Site Controls

C.6.e.iii.(3)(a), (b), (c), (d) ► Site/Inspection Totals			
Number of active Hillside Sites (sites disturbing < 1 acre of soil requiring storm water runoff quality inspection) (C.6.e.iii.3.a)	Number of High Priority Sites (sites disturbing < 1 acre of soil requiring storm water runoff quality inspection) (C.6.e.iii. 3.c)	Number of sites disturbing ≥ 1 acre of soil (C.6.e.iii.3.b)	Total number of storm water runoff quality inspections conducted (include only Hillside Sites, High Priority Sites and sites disturbing 1 acre or more) (C.6.e.iii. 3.d)
0	4	13	17
<p>Comments:</p> <p>A total of 110 construction site inspections were conducted at total of 17 sites within these categories during Fiscal Year 2017-2018. Of the sites that were greater than 1 acre, two sites were new projects while the other eleven sites were projects from the previous year.</p> <p>One additional site that did not meet the above criteria was inspected as-needed during Fiscal Year 2017-2018 as part of the Program’s construction site inspection program. This site was inspected due to housekeeping and/or track-out issues reported/noticed during normal field inspections and was brought back into compliance.</p>			

C.6.e.iii.(3)(e) ► Construction Related Storm Water Enforcement Actions

	Enforcement Action (as listed in ERP) ⁵¹	Number Enforcement Actions Issued
Level 1 ⁵²	Verbal Warning/Notice of Violation	18
Level 2	Administrative Citation	0
Level 3	Compliance Meeting/Stop Work Order/Cease & Desist Order/Notice to Abate a Public Nuisance	0
Level 4	Criminal Penalties/Civil Injunctions	0
Total		18

C.6.e.iii.(3)(f), ► Illicit Discharges

	Number
Number of illicit discharges, actual and those inferred through evidence at hillside sites, high priority sites and sites that disturb 1 acre or more of land (C.6.e.iii. 3.f)	1

C.6.e.iii.(3)(g) ► Corrective Actions

Indicate your reporting methodology below.	
<input checked="" type="checkbox"/>	Permittee reports multiple discrete potential and actual discharges as one enforcement action.
<input type="checkbox"/>	Permittee reports the total number of discrete potential and actual discharges on each site.
	Number
Enforcement actions or discrete potential and actual discharges fully corrected within 10 business days after violations are discovered or otherwise considered corrected in a timely period (C.6.e.iii. .3.g)	8
Comments: None at this time.	

⁵¹Agencies should list the specific enforcement actions as defined in their ERPs.

⁵²For example, Enforcement Level 1 may be Verbal Warning.

C.6.e.iii.(4) ► Evaluation of Inspection Data

Describe your evaluation of the tracking data and data summaries and provide information on the evaluation results (e.g., data trends, typical BMP performance issues, comparisons to previous years, etc.).

Description:
Overall there were no major problems with the construction sites in 2017/2018. The most common issues for 2017/2018 were for sediment control (track out and potential runoff), run-on and run-off and general site maintenance. There were seven more regulated projects in progress in 2017/2018 than in 2016/2017, translating to more inspections conducted throughout the wet season. Based on information through the City's Planning Committee and Building Department, it is expected that rates of new development and redevelopment will continue to remain steady in the coming years as the economy continues to grow. The City will attempt to maintain a high level of scrutiny as the number of sites increases.

C.6.e.iii.(4) ► Evaluation of Inspection Program Effectiveness

Describe what appear to be your program's strengths and weaknesses, and identify needed improvements, including education and outreach.

Description:
The City of South San Francisco's program is strong, with frequent inspections performed at each construction site especially during the wet weather season. Inspectors inspect each construction site before the beginning of the wet weather season, prior to qualifying rain events and several times during an extended or severe storm. Inspectors follow up at each site after the storm to determine if any repairs are necessary. Most sites are very quick to respond and repair or replace their BMPs. Occasionally there are sites that require numerous inspections to illicit a response and repair their site BMPs. Inspectors try to work with these sites to bring them back into compliance. While it may occasionally take more than 10 business days, this leeway is only given when discharge from the site is not observed. Inspectors participate in erosion control training at least once every 2 years. Inspection and enforcement data is tabulated in a construction tracking spreadsheet, which underwent minor revision in 2017-2018. The program uses inspection forms that were updated in July 2016. The City of South San Francisco participates in the SMCWPPP New Development Subcommittee and attended meetings during FY 17-18. Refer to the C.6 Construction Site Control section of the SMCWPPP FY 17-18 Annual Report for a description of activities at the countywide or regional level.

C.6.f.iii ► Staff Training Summary			
Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance
SMCWPPP Construction Site Stormwater Inspections Training for Municipal Inspectors	3/20/18	Construction Site Regulations and BMPs, Inlet Protection, Sediment and Erosion Control	4
NSC Certified Stormwater Inspector Training	3/12-3/13/18	Stormwater Permit Compliance including: Inspections (Industry, Construction, Commercial, Municipal); Annual Reports; Stormwater Visual Observations; Elimination of Non Stormwater Discharges; Public Information and Education and Outreach; Document Control; Audits; Illicit Discharge Detection & Elimination	2

Section 7 – Provision C.7. Public Information and Outreach

C.7.b.i.1 ► Outreach Campaign

Summarize outreach campaign. Include details such as messages, creative developed, and outreach media used. The detailed outreach campaign report may be included as an attachment. If outreach campaign is being done by participation in a countywide or regional program, refer to the separate countywide or regional Annual Report.

Summary:

See Section 7 and Section 9 of the SMCWPPP FY 17-18 Annual Report for a description of outreach campaign activities conducted at the countywide level.

The City of South San Francisco’s ongoing outreach campaign includes providing informational materials and items (including reusable shopping bags) displaying the City’s Pollution Prevention messages, “Pollution Prevention is Everyone’s Job” and/or “Keep South San Francisco Beautiful.” The majority of this campaign utilizes printed media, which is disseminated at local and regional events such as Farmers’ Markets, City events, Creek Cleanups and at the library during Pollution Prevention Week.

In addition, in June 2015, the City of South San Francisco contracted with NCM to advertise an anti-Cigarette Butt Littering message to residents in the service area at the Tanforan Movie Theatre in San Bruno, CA. The audio/video advertisement is 15 seconds long and plays on each screen prior to the coming attractions. The video advertisement has also been posted on the City’s website at <http://www.ssf.net/2119/Outreach-Activities>. The advertisement has been renewed each subsequent year and played again during FY 17-18.

C.7.c. Stormwater Pollution Prevention Education

No change.

C.7.d ► Public Outreach and Citizen Involvement Events		
<p>Describe general approach to event selection. Provide a list of outreach materials and giveaways distributed. Use the following table for reporting and evaluating public outreach events</p> <p>See Section 7 of the SMCWPPP FY 17-18 Annual Report for a description of public outreach and citizen involvement events activities conducted at the countywide level.</p>		
Event Details	Description (messages, audience)	Evaluation of Effectiveness
<p>Provide event name, date, and location. Indicate if event is local, countywide or regional. Indicate if event is public outreach or citizen involvement.</p>	<p>Identify type of event (e.g., school fair, creek clean-up, storm drain stenciling, farmers market etc.), type of audience (school children, gardeners, homeowners etc.) and outreach messages (e.g., Enviroscene presentation, pesticides, stormwater awareness)</p>	<p>Provide general staff feedback on the event (e.g., success at reaching a broad spectrum of the community, well attended, good opportunity to talk to gardeners etc.). Provide other details such as:</p> <ul style="list-style-type: none"> • Success at reaching a broad spectrum of the community • Number of participants compared to previous years. • Post-event effectiveness assessment/evaluation results • Quantity/volume of materials cleaned up, and comparisons to previous efforts
<p>City of SSF Farmers' Market (Local event) Orange Park South San Francisco, CA 7/15/17</p>	<p>Event: Farmers' Market</p> <p>Audience: Local residents, homeowners, children</p> <p>Message: Pollution Prevention (Stormwater, Household Haz Waste, Fats, Oils and Grease, Car Washing)</p>	<p>Environmental Compliance Staff members staffed a Pollution Prevention Outreach Booth, interacting with an estimated 70 local residents regarding the City's Pollution Prevention efforts. As in previous years, this event was successful in that a broad spectrum of local residents and business owners attend the market and staff is able to interact with them. Approximately 50 Reusable Shopping Bags and 87 other items bearing the City's Stormwater Pollution Prevention message were distributed.</p>
<p>City of SSF Farmers' Market (Local event) Orange Park South San Francisco, CA</p>	<p>Event: Farmers' Market</p>	<p>Environmental Compliance Staff members staffed a Pollution Prevention Outreach Booth,</p>

<p>8/12/17</p>	<p>Audience: Local residents, homeowners, children</p> <p>Message: Pollution Prevention (Stormwater, Household Haz Waste, Fats, Oils and Grease, Car Washing)</p>	<p>interacting with over 35 local residents regarding the City's Pollution Prevention efforts. As in previous years, this event was successful in that a broad spectrum of local residents and business owners attend the market and staff is able to interact with them.</p> <p>Approximately 50 Reusable Shopping Bags and 114 other items bearing the City's Stormwater Pollution Prevention message were distributed.</p>
<p>FY 17-18 Coordination of California Coastal Clean-up Day in San Mateo County 9/16/17 (Local event in South San Francisco)</p>	<p>Coastal clean-up event – Colma Creek hot spot clean-up. Pollution prevention/anti-littering outreach materials and information to general public and volunteers.</p>	<p>Over 65 volunteers in South San Francisco participated in cleaning up 2400+ feet along Colma Creek and collected approximately 1122 gallons of trash and debris. This number was up from the 200 gallons of trash picked up in FY 2016-2017.</p> <p>The event was deemed successful as a broad spectrum of the community was reached and volunteers could tangibly connect littering's effect on the storm drain system and creek/Bay.</p>
<p>FY 17-18 Coordination of California Coastal Clean-up Day in San Mateo County 9/16/17 – Countywide event</p>	<p>Coastal clean-up event Stormwater pollution prevention outreach information was provided at the cleanup site to general public and volunteers. City of SSF staff participated in cleanup event and logistics with San Mateo County personnel. Advertised event through City displays and outreach tables.</p>	<p>See the C.7 Public Information and Outreach section of SMCWPPP's FY 17-18 Annual Report for more details on the county-wide data from this event.</p> <p>Over 65 volunteers in South San Francisco participated in cleaning up 2400+ feet along Colma Creek and collected 1122 gallons of trash and debris.</p>
<p>Pollution Prevention Week (Local Event) South San Francisco Public Library 9/26/17-9/27/17</p>	<p>Event: local City Library event</p> <p>Audience: Local residents and schoolchildren.</p> <p>Message: Pollution Prevention (Stormwater, Household Haz Waste, Fats, Oils and Grease, Car Washing)</p>	<p>Environmental Compliance Staff members interacted with approximately 120 local residents and students. Stormwater Pollution Prevention information and items were provided.</p> <p>Approximately 150 Reusable Shopping Bags and 597 other items bearing the City's Stormwater Pollution Prevention message were distributed.</p>

		As in previous years, this event was a success, as we are able to interact with a broad spectrum of the City's residents and employees – including high school and elementary school students using the public library after school.
FY 17-18 SSF Community Preservation Task Force Creek Cleanup 1/19/18 (Local event in South San Francisco)	Local creek clean-up event – Colma Creek near South Airport Blvd. bridge. Pollution prevention/anti-littering outreach materials and information to general public and volunteers.	Over 20 volunteers in South San Francisco participated in cleaning up along Colma Creek and collected approximately 320 gallons of trash and debris. Approximately 23 Reusable Shopping Bags and 49 other items bearing the City's Stormwater Pollution Prevention message were distributed. The event was deemed successful as a broad spectrum of the community was reached and volunteers could tangibly connect littering's effect on the storm drain system and creek/Bay.
Earth Day Colma Creek Cleanup Local Event Colma Creek in SSF, CA near Bay Trail 4/21/18	Creek Clean-up event with San Mateo County Environmental Health Audience: Community members Message: Pollution prevention (keeping litter/trash from storm drains and creek/Bay).	Approximately 20 Volunteers removed trash and debris from both sides of an approximate 1200-foot stretch of Colma Creek near the WQCP and Bay Trail pedestrian bridge. Approximately 278 gallons of trash was removed. This event was deemed successful as a broad spectrum of the community was reached and volunteers could tangibly connect littering's effect on the storm drain system and creek/Bay.
City of SSF Siebecker Preschool Earth Week Local Event 4/26/18	Outreach Materials Provided to Preschool Teachers in support of Earth Week activities at the school	Approximately 25 Reusable Shopping Bags and bearing the City's Stormwater Pollution Prevention were distributed to the preschool teachers. The event was deemed successful as a broad spectrum of the community was reached with our stormwater pollution prevention message, and based on the enthusiasm of the teachers.
Amgen Earth Day Fair (Local Event) 1150 Veterans Blvd, SSF, CA 94080 5/3/18	Local Corporate Fair Audience: Local businesses, residents and employees of Amgen.	The Environmental Compliance Program staffed a booth at the Amgen Earth Day Fair, which included various organizations and companies

	<p>Message: Message: Pollution Prevention (Stormwater, Household Haz Waste, Fats, Oils and Grease, Car Washing).</p>	<p>interested in presenting Pollution Prevention-themed ideas and information. Approximately 150 people visited the South San Francisco Environmental Compliance table. Approximately 197 Reusable Shopping Bags and 156 additional items bearing the City's Stormwater Pollution Prevention message were distributed. As in previous years, this event was deemed successful, as we were able to interact with several different members of the community as well as a portion of Amgen's over 500 employees working in our service area.</p>
<p>National Rivers Day Colma Creek Cleanup Local Event Colma Creek at Utah Ave Bridge, SSF, CA 5/19/18</p>	<p>Creek Clean-up event Coordinated with City employees and San Mateo County Environmental Health Audience: community members Message: Pollution prevention (keeping litter/trash from storm drains and creek/Bay).</p>	<p>Approximately 8 Volunteers removed trash and debris from an approximate 1200-foot stretch of Colma Creek near the Utah Avenue bridge. Approximately 230 gallons trash was removed. This event was deemed successful as various community members could tangibly connect littering's effect on the storm drain system and creek/Bay.</p>
<p>San Mateo County Fair – Pollution Prevention Outreach Booth Countywide Event San Mateo, CA 6/9/18 and 6/13/18</p>	<p>2 City of SSF volunteers staffed the San Mateo Countywide Pollution Prevention table at the County Fair. Outreach items and information was distributed to the general public.</p>	<p>See the C.7 Public Information and Outreach section of SMCWPPP's FY 17-18 Annual Report for more details on the county-wide data from this event.</p>
<p>City of SSF Citizen's Academy (local) SSF WQCP 6/12/18</p>	<p>Event: Citizen involvement event Audience: Local citizens Message: Wastewater treatment, stormwater pollution prevention</p>	<p>City Public Works provided education and outreach materials bearing the City's stormwater pollution prevention message to 25 local citizens, including reusable bags, key chains and reusable water bottles. The event was deemed a success, as the group was made up of a variety of citizens interested in City operations, who are highly involved in community issues. Therefore, the pollution prevention message would be carried</p>

		exponentially after the attendees left the Academy.
--	--	---

C.7.e. ► Watershed Stewardship Collaborative Efforts

Summarize watershed stewardship collaborative efforts and/or refer to a regional report that provides details. Describe the level of effort and support given (e.g., funding only, active participation etc.). State efforts undertaken and the results of these efforts. If this activity is done regionally refer to a regional report.

Evaluate effectiveness by describing the following:

- Efforts undertaken
- Major accomplishments

Summary:

See Section 7 of the SMCWPPP FY 17-18 Annual Report for a description of watershed stewardship collaborative efforts conducted at the countywide level.

C.7.f. ► School-Age Children Outreach

Summarize school-age children outreach programs implemented. A detailed report may be included as an attachment.

Use the following table for reporting school-age children outreach efforts.

See Section 7 of the SMCWPPP FY 17-18 Annual Report for a description of school-age children outreach efforts conducted at the countywide level.

Program Details	Focus & Short Description	Number of Students/Teachers reached	Evaluation of Effectiveness
City of SSF Environmental Compliance Program – Pollution Prevention materials for Ocean/Bay Week Siebecker Preschool SSF 7/27/17	Event: Ocean/Bay Week at SSF Siebecker Preschool Audience: School-aged children (3-5) Message: Pollution Prevention (Stormwater) Description: Stormwater Pollution Prevention outreach items provided to students and teachers supporting Ocean/Bay Week at the school. 35 kits with items bearing the City’s Stormwater Pollution Prevention message were distributed, including stickers, erasers and magnets.	12 SSF Parks and Recreation Preschool teachers and 35 students were provided with materials and information.	The event was deemed successful based on the students’ reactions/enthusiasm and feedback from staff– as well as being able to reach young minds with our message that they may then take home to their parents as well.

<p>City of SSF Environmental Compliance Program – Pollution Prevention Materials to SSFUSD elementary school students Local Event 3/27, 4/17, 5/7, 5/15, 5/18 & 5/21/18</p>	<p>Event: Pollution Prevention Materials SSFUSD elementary schools Audience: All SSFUSD elementary school students and teachers Message: Stormwater Pollution Prevention via proper disposal of Fats, Oils and Grease (FOG). Description: Each student received a compostable waste FOG Cup and Lid, Grease Scraper and informational pamphlet stressing the importance of proper FOG disposal to avoid sanitary sewer overflows, which can flow to the stormwater system and damage the environment and public health. Each teacher received a reusable shopping bag with the City's stormwater pollution prevention message printed on it.</p>	<p>3939 students and 175 teachers received materials to take home/use.</p>	<p>The event was deemed successful based on the large scope of students and community members we were able to reach with our message that they may then take home to their parents as well. Approximately 175 Reusable Shopping Bags and over 12,000 other items bearing the City's FOG and Pollution Prevention message were distributed.</p>
<p>City of SSF Church of the Epiphany Elementary School Local Event 5/3/18</p>	<p>Event: Outreach materials provided to an elementary school class. Audience: 25-student elementary class Message: Stormwater Pollution Prevention Description: Each student received a Kid's Activity Book, Maze Game, Pencil and Ruler bearing the City's Stormwater Pollution Prevention message.</p>	<p>25 students and 1 teacher</p>	<p>The event was deemed successful as we were able to reach young students with our message that they may then take home to their parents as well. 1 Reusable Shopping Bag and 125 other items bearing the City's Stormwater Pollution Prevention message were distributed.</p>

Section 9 – Provision C.9 Pesticides Toxicity Controls

C.9.a. ► Implement IPM Policy or Ordinance							
Is your municipality implementing its IPM Policy/Ordinance and Standard Operating Procedures?				<input checked="" type="checkbox"/>	Yes	<input type="checkbox"/>	No
If no, explain:							
Report implementation of IPM BMPs by showing trends in quantities and types of pesticides used, and suggest reasons for increases in use of pesticides that threaten water quality, specifically organophosphates, pyrethroids, carbamates fipronil, indoxacarb, diuron, and diamides. A separate report can be attached as evidence of your implementation.							
Trends in Quantities and Types of Pesticide Active Ingredients Used ⁵³							
Pesticide Category and Specific Pesticide Active Ingredient Used	Amount ⁵⁴						
	FY 15-16	FY 16-17	FY 17-18	FY 18-19	FY 19-20	FY 20-21	
Organophosphates	None	None	None				
Active Ingredient Chlorpyrifos		None	None				
Active Ingredient Diazinon		None	None				
Active Ingredient Malathion		None	None				
Pyrethroids (see footnote #57 for list of active ingredients)	None	None	None				
Active Ingredient (Permethrin)		None	0.35 oz				
Active Ingredient Type Y		None	None				
Carbamates	None	None	None				
Active Ingredient Carbaryl		None	None				
Active Ingredient Aldicarb		None	None				
Fipronil	None	None	None				

⁵³Includes all municipal structural and landscape pesticide usage by employees and contractors.

⁵⁴Weight or volume of the active ingredient, using same units for the product each year. Please specify units used. The active ingredients in any pesticide are listed on the label. The list of active ingredients that need to be reported in the pyrethroids class includes: metofluthrin, bifenthrin, cyfluthrin, beta-cyfluthrin, cypermethrin, deltamethrin, esfenvalerate, lambdacyhalothrin, and permethrin.

Indoxacarb	Reporting not required in FY 15-16	None	None			
Diuron	Reporting not required in FY 15-16	None	None			
Diamides	Reporting not required in FY 15-16	None	None			
Active Ingredient Chlorantraniliprole		None	None			
Active Ingredient Cyantraniliprole		None	None			
<p>IPM Tactics and Strategies Used:</p> <p>The City of SSF implemented IPM tactics and strategies during FY 17-18 including:</p> <ul style="list-style-type: none"> • Use of non-chemical strategies such as monitoring, mowing, mulching and other mechanical means of weed abatement when possible. • Replacing invasive plants with natives. • Allowing allopathic leaf litter to remain on site for weed suppression. <p>Permethrin was used in 2017-2018 by the South San Francisco Tree Crew in order to mitigate several wasp nests.</p>						

C.9.b ▶ Train Municipal Employees	
Enter the number of employees that applied or used pesticides (including herbicides) within the scope of their duties this reporting year.	5
Enter the number of these employees who received training on your IPM policy and IPM standard operating procedures within this reporting year.	5
Enter the percentage of municipal employees who apply pesticides who have received training in the IPM policy and IPM standard operating procedures within this reporting year.	100%
Type of Training:	

City of SSF Parks and Rec staff attended the following training FY 17-18:

- Bay-Friendly Training & Qualification for Maintaining Sustainable Landscapes
- SMCWPPP Landscape IPM Training (3/8/17)
- Five staff members hold QAC licenses and two additional staff members are training to obtain the QAC.

C.9.c ▶ Require Contractors to Implement IPM			
Did your municipality contract with any pesticide service provider in the reporting year, for either landscaping or structural pest control?	X	Yes	No
If yes, did your municipality evaluate the contractor’s list of pesticides and amounts of active ingredients used?	X	Yes	No,

If your municipality contracted with any pesticide service provider, briefly describe how contractor compliance with IPM Policy/Ordinance and SOPs was monitored

The City of South San Francisco verifies IPM contractor performance by hiring professionals that certify they are properly trained and use IPM.

Brightview Landscape Company
4055 Bohannon Dr,
Menlo Park, CA 94025

Western Exterminators
1320 Marsten Rd
Ste D
Burlingame, CA 94010

The City of South San Francisco contract specifications require adherence to IPM, including:

The Contractor shall act as or coordinate with a licensed specialist to identify any Pest management problems that may arise in the street and parkway landscape; and

The Contractor shall be familiar with various integrated pest management (IPM) programs. The Contractor is required to develop and adopt an IPM plan that complies with an IPM plan consistent with the IPM-based hierarchical decision making process (established by Provision C.9.d, of Water Board Permit No. R2-2009-0074, Municipal Regional Stormwater NPDES Permit) and the City-approved IPM Policy to effectively eradicate any diseases or pests which develop during the duration of this contract. The development and execution of the IPM program shall be the responsibility of the Contractor and will not be considered extra work.

The City of South San Francisco Parks Manager requests any or all labels, licenses, certificates, categories, permits or recommendations before chemicals are applied. An IPM plan developed by the Contractor may have to be approved by the Parks Manager and the County Agricultural Commissioner before implementation. A MSDS must be submitted for each chemical to be used prior to any application program.

Prior to application, the Contractor shall provide a copy of any spray report showing details of areas, times, chemicals, MSDS, and rates of application as provided by a licensed pest control advisor. A copy shall be provided with billing at the end of the month as well.

The Contractor shall provide the County Agricultural Commissioner's office (as required by law) a monthly record of all pesticides used in the street and parkway landscape facilities. A copy of the same report shall be included with the Contractor's monthly billing to the City. Column "F" of the standard monthly report to the Commissioner shall indicate that a chemical has been used on a South San Francisco facility. Indicate also the types of weeds treated using common names.

The City of South San Francisco Parks Department meets bi-weekly with approved IPM contractors to discuss upcoming projects and maintenance activities, including use of pesticides – pertaining to the contract specifications above and IPM implementation. These meetings are the primary

procedure used by the City to ensure compliance with IPM policy. Noncompliance with any of these contractual IPM provisions could constitute breach of contract and cessation of services.

Additionally, IPM contractors are required to submit spray reports and monthly pesticide application records to the City with monthly billing documents - upon which they are reviewed by the City to ensure compliance with IPM contractual requirements.

C.9.d ▶ Interface with County Agricultural Commissioners

Did your municipality communicate with the County Agricultural Commissioner to: (a) get input and assistance on urban pest management practices and use of pesticides or (b) inform them of water quality issues related to pesticides,	<input type="checkbox"/>	Yes	<input checked="" type="checkbox"/>	No
---	--------------------------	-----	-------------------------------------	----

If yes, summarize the communication. If no, explain.
 See Section 9 of the SMCWPPP FY 17-18 Annual Report for a summary of communication with the San Mateo County Agricultural Commissioner.

Did your municipality report any observed or citizen-reported violations of pesticide regulations (e.g., illegal handling and applications of pesticides) associated with stormwater management, particularly the California Department of Pesticide Regulation (DPR) surface water protection regulations for outdoor, nonagricultural use of pyrethroid pesticides by any person performing pest control for hire.	<input type="checkbox"/>	Yes	<input checked="" type="checkbox"/>	No
--	--------------------------	-----	-------------------------------------	----

If yes, provide a summary of improper pesticide usage reported to the County Agricultural Commissioner and follow-up actions taken to correct any violations. A separate report can be attached as your summary.

C.9.e.ii (1) ▶ Public Outreach: Point of Purchase

Provide a summary of public outreach at point of purchase, and any measurable awareness and behavior changes resulting from outreach (here or in a separate report); **OR** reference a report of a regional effort for public outreach in which your agency participates.

Summary:
 See Section 9 of the SMCWPPP FY 17-18 Annual Report for a description of point of purchase public outreach efforts conducted at the countywide level and regionally.

C.9.e.ii (2) ▶ Public Outreach: Pest Control Contracting Outreach

Provide a summary of outreach to residents who use or contract for structural pest control and landscape professionals); **AND/OR** reference a report of a regional effort for outreach to residents who hire pest control and landscape professionals in which your agency participates.

Summary:

See Section 9 of the SMCWPPP FY 17-18 Annual Report for a summary of outreach to residents who hire pest control and landscape professionals.

C.9.e.ii.(3) ► Public Outreach: Pest Control Operators

Provide a summary of public outreach to pest control operators and landscapers and reduced pesticide use (here or in a separate report); **AND/OR** reference a report of a regional effort for outreach to pest control operators and landscapers in which your agency participates.

Summary:

See Section 9 of the SMCWPPP FY 17-18 Annual Report for a summary of pest control operators and landscapers to reduce pesticide use.

C.9.f ► Track and Participate in Relevant Regulatory Processes

Summarize participation efforts, information submitted, and how regulatory actions were affected; **AND/OR** reference a regional report that summarizes regional participation efforts, information submitted, and how regulatory actions were affected.

Summary:

During FY 17-18, we participated in regulatory processes related to pesticides through contributions to the Countywide Program, BASMAA and CASQA. For additional information, see the Regional Report submitted by BASMAA on behalf of all MRP Permittees.

Section 10 - Provision C.10 Trash Load Reduction

C.10.a.i ► Trash Load Reduction Summary	
For population-based Permittees, provide the overall trash reduction percentage achieved to-date within the jurisdictional area of your municipality that generates problematic trash levels (i.e., Very High, High or Moderate trash generation). Base the reduction percentage on the information presented in C.10.b i-iv and C.10.e.i-ii. Provide a discussion of the calculation used to produce the reduction percentage	
Trash Load Reductions	
Percent Trash Reduction in All Trash Management Areas (TMAs) due to Trash Full Capture Systems (as reported C.10.b.i)	43.6%
Percent Trash Reduction in all TMAs due to Control Measures Other than Trash Full Capture Systems (as reported in C.10.b.ii) ⁵⁵	25.9%
Percent Trash Reduction due to Jurisdictional-wide Source Control Actions (as reported in C.10.b.iv)	10.0%
SubTotal for Above Actions	79.5%
Trash Offsets (Optional)	
Offset Associated with Additional Creek and Shoreline Cleanups (as reported in C.10.e.i)	0.0%
Offset Associated with Direct Trash Discharges (as reported in C.10.e.ii)	NA
Total (Jurisdictional-wide) % Trash Load Reduction through FY 2017-18	79.5%
<p>Discussion of Trash Load Reduction Calculation: The City attained and reported 83.2% trash load reduction (including trash offsets) in its FY 16-17 Annual Report. During FY 17-18, the City continued to implement a robust trash control measure program. This helped the City maintain its trash load reduction above the mandatory 70% trash load reduction requirement included in the MRP. The total (jurisdiction-wide) percent trash load reduction in FY 17-18 is 79.5% (including trash offsets). The most recent version of the City's Baseline Trash Generation Map can be downloaded at URL here: http://www.flowstobay.org/content/municipal-trash-generation-maps</p> <p>During FY-17-18, the City will evaluate new strategic areas to install additional trash capture devices to ensure compliance with 80% trash load reduction goal by June 30, 2019.</p>	

⁵⁵ See Appendix 10-1 for changes between 2009 and FY 17-18 in trash generation by TMA as a result of Full Capture Systems and Other Measures.

C.10.a.ii.b ► Trash Generation Area Management - Identification of Private Drainages >10,000 ft²

State (Y/N) if your agency completed Permit Provision C.10.a.ii.b. If Yes, attach a map (or other record) or provide a website link to a map (or other record) of the location of lands >10,000 ft² (in Very High, High, and Moderate trash generation areas) that are plumbed directly to the Permittee's storm drain systems, including trash control status of these areas. If No, provide explanation of why the provision was not completed and the estimated date when the provision will be completed.

Did your agency complete Permit Provision C.10.a.ii.b?	X	Yes		No		NA
--	---	-----	--	----	--	----

If No, provide explanation and estimated completion date:
 N/A

Description of the process used to identify applicable areas and their trash control status:

The City worked through SMCWPPP to identify the location of land areas >10,000 ft² in very high, high, and moderate trash generation areas (as depicted on the City's baseline trash generation map) that are plumbed directly to the City's MS4. In summary, applicable land areas were identified using existing data/information and a combination of desktop analyses and field visits. Land areas <10,000 ft², or areas identified as low trash generating on the City's baseline trash generation maps, or are currently treated by full capture systems were excluded from the analysis. The preliminary trash control status of these land areas were identified by conducting virtual (desktop) on-land visual trash assessments (OVTAs). For a complete description of the methods and process used to identify applicable land areas and their trash control status, please see the SMCWPPP FY 17-18 Annual Report.

URL link to Map:

<http://www.flowstobay.org/content/municipal-trash-generation-maps>

C.10.a.iii ► Mandatory Trash Full Capture Systems		
Provide the following:		
1) Total number and types of full capture systems (publicly and privately-owned) installed prior to FY 17-18, during FY 17-18, and to-date, including inlet-based and large flow-through or end-of-pipe systems, and qualifying low impact development (LID) required by permit provision C.3.		
2) Total land area (acres) treated by full capture systems for population-based Permittees and total number of systems for non-population based Permittees compared to the total required by the permit.		
Type of System	# of Systems	Areas Treated (Acres)
Installed Prior to FY 17-18		
Connector Pipe Screen (Public)	335	1373.2
Low Impact Development (Private)	1	9.7
Installed in FY 17-18		
None	-	-
Total for all Systems Installed To-date	336	1,385.6
Treatment Acreage Required by Permit (Population-based Permittees)		58
Total # of Systems Required by Permit (Non-population-based Permittees)		N/A

C.10.b.i ► Trash Reduction - Full Capture Systems

Provide the following:

- 1) Jurisdiction-wide trash reduction in FY 17-18 attributable to trash full capture systems implemented in each TMA;
- 2) The total number of full capture systems installed to-date in your jurisdiction;
- 3) The percentage of systems in FY 17-18 that exhibited significant plugged/blinded screens or were >50% full when inspected or maintained;
- 4) A narrative summary of any maintenance issues and the corrective actions taken to avoid future full capture system performance issues; and
- 5) A certification that each full capture system is operated and maintained to meet the full capture system requirements in the permit.

TMA	Jurisdiction-wide Reduction (%)	Total # of Full Capture Systems	% of Systems Exhibiting Plugged/Blinded Screens or >50% full in FY 17-18	Summary of Maintenance Issues and Corrective Actions
1	19.4%	317	0%	<p>These Full Trash Capture devices are inspected/maintained on an average frequency of three times per year - before, during and after storm events. The main issue with the devices is the potential to plug up during storms causing flooding, therefore frequent maintenance is required. Upon installation of the devices, the City had expected to only clean/maintain the devices before and after each storm. However, based on this flooding concern, it has been found that the devices required cleaning/maintenance during storms as well. Another issue with the devices is that the contractor is unavailable to help troubleshoot, as they have gone out of business. Maintenance records are on the Computerized Maintenance Management System (CMMS) located on the City server – CityWorks (maintenance records and reports) and are therefore easily accessed for audit purposes. The areas of treatment for each trash capture device are included in the City of South San Francisco’s Long-term Trash Load Reduction Plan submitted on February 1, 2014.</p> <p>During FY 2017-2018, none of the installed devices were found to be > 25% full, and none of the systems exhibited plugged or blinded screens – attributed to the aggressive maintenance schedule noted above.</p>
2	1.4%			
3	1.2%			
4	7.6%			
5	13.8%			
6	0.0%			
7	0.2%			
8	0.0%			
9	0.1%			
Total	43.6%			

Certification Statement:

The City of South San Francisco certifies that a full capture system maintenance and operation program is currently being implemented to maintain all applicable systems in manner that meets the full capture system requirements included in the Permit.

C.10.b.ii ► Trash Reduction – Other Trash Management Actions (PART A)	
Provide a summary of trash control actions other than full capture systems or jurisdictional source controls that were implemented within each TMA, including the types of actions, levels and areal extent of implementation, and whether actions are new, including initiation date.	
TMA	Summary of Trash Control Actions Other than Full Capture Systems
1	Partial Trash Capture: Wing-gate devices (automatic retractable curb inlet screen covers) were installed along sections of Grand Avenue, which capture wind-blown trash and litter at the street level, reducing the level of trash making it into the MS4 from this TMA. These devices are cleaned regularly through the city's street sweeping efforts and trash vacuum vehicle.
2	Improved Trash Bin/Container Management: City staff has been conducting Stormwater inspections throughout the jurisdiction. If during the inspection the site has trash stored improperly, has dumpster lids uncovered, damaged, missing or the facility is otherwise unkempt the City requires them to clean up their facility of trash, litter and keep their dumpster lids closed. If compliance is not achieved enforcement actions are taken as necessary. This is to minimize wind-blown litter and trash accumulation. The City has been focusing on businesses to move their trash bins off the street and place them inside or out of sight since FY 13-14. The focus was to prevent unlawful outdoor storage, ensure a tight-fitting lid on the container and minimize wind-blown litter and trash accumulation.
3	Improved Trash Bin/Container Management: In 2015, the City began working with SSF Scavenger through SMCWPPP's Litter Workgroup, and has targeted an area in this TMA and performed an initial Pilot Study into potential collaborative litter reduction efforts.
3	Improved Trash Bin/Container Management: City staff has been conducting Stormwater inspections throughout the jurisdiction. If during the inspection the site has trash stored improperly, has dumpster lids uncovered, damaged, missing or the facility is otherwise unkempt the City requires them to clean up their facility of trash, litter and keep their dumpster lids closed. If compliance is not achieved enforcement actions are taken as necessary. This is to minimize wind-blown litter and trash accumulation. The City has been focusing on businesses to move their trash bins off the street and place them inside or out of sight since FY 13-14. The focus was to prevent unlawful outdoor storage, ensure a tight-fitting lid on containers and minimize wind-blown litter and trash accumulation.
3	Partial Trash Capture: A large shopping center making up approximately 50% of TMA 3 that had previously contributed very heavily to the original trash load was demolished and redeveloped in 2013-2014. The redeveloped commercial shopping center incorporates several BMPs and private trash capture/ stormwater treatment devices on site, reducing the level of trash making it into the MS4 from this TMA.
5	Improved Trash Bin/Container Management: City staff has been conducting Stormwater inspections throughout the jurisdiction. If during the inspection the site has trash stored improperly, has dumpster lids uncovered, damaged, missing or the facility is otherwise unkempt the City requires them to clean up their facility of trash, litter and keep their dumpster lids closed. If compliance is not achieved enforcement actions are taken as necessary. This is to minimize wind-blown litter and trash accumulation. The City has been focusing on businesses to move their trash bins off the street and place them inside or out of sight since FY 13-14. The focus was to prevent unlawful outdoor storage, ensure a tight fitting lid on containers and minimize wind-blown litter and trash accumulation.

	Illegal Dumping Controls: Barriers were installed in two locations in FY 13-14 per the Long-term Trash Plan.
7	Container Management: Parks Division purchased 30 additional polyethylene trash can domes to limit litter blowing away in windy, high trash areas and developed areas. Additionally, the City revised the new construction trash can standard to include partial covers on cans to minimize litter escape. Twenty-four new permanent trash cans with partial covers were installed at 5 new sites.
1-9	On-land Cleanup: SSF Adopt-A-Storm Drain Program was implemented during FY 2016-2017. Volunteers request a storm drain catch basin(s) and are provided with cleanup materials by the City. Volunteers then regularly clean the street/gutter area around the catch basin and the catch basin grates. To date, 110 volunteers have signed up to adopt 151 storm drain catch basins.

Summary of Trash Control Measures Other than Full Capture Devices: (Do not delete this section)

- **Street Sweeping:** Include a description of any enhancements or new actions implemented after the MRP 1.0 effective date (i.e., December 2009). Identify portions of the TMA where enhanced street sweeping (i.e., increased sweeping frequency) and parking enforcement above 2009 levels was implemented.
- **On-land Cleanup:** Include a description of on-land cleanup activities that began after the MRP 1.0 effective date (i.e., December 2009) and continued into FY 17-18, including any enhancements or new actions implemented in FY 17-18. Describe if these actions are Permittee or volunteer-led.
- **Partial Capture Devices:** Provide a description of devices installed after the MRP 1.0 effective date (i.e., December 2009). Describe the level of maintenance conducted per device types.
- **Storm Drain Inlet Cleaning:** Describe storm drain inlet maintenance activities implemented after the MRP 1.0 effective date (i.e., December 2009) and continued in FY 17-18, including any enhancements or new maintenance activities implemented in FY 17-18. For new/enhanced actions, include the number of inlets where enhanced maintenance occurred, and the increased frequency of maintenance.
- **Uncovered Loads:** Describe activities designed to reduce trash from uncovered loads that began after the MRP 1.0 effective date (i.e., December 2009) and continued in FY 17-18, including any enhancements or new actions implemented in FY 17-18. Describe the types of actions implemented including new or redirected enforcement efforts to increase the focus towards new or enhanced actions.
- **Anti-littering and illegal dumping enforcement activities:** Describe anti-littering and illegal dumping enforcement activities began after to the MRP 1.0 effective date (i.e., December 2009) and continued in FY 17-18, and any enhancements or new actions implemented in FY 17-18. Include any new or redirected enforcement efforts to increase the focus towards new or enhanced actions. Describe the number of citations or other correction actions accomplished this year, and compare with previous years. Indicate how anti-littering and illegal dumping enforcement records are kept, and how they may be retrieved for audit.
- **Improved Trash Bin/Container Management:** Describe activities designed to improve trash bin/container management that began after the MRP1.0 effective date (i.e., December 2009) and continued in FY 17-18, and any enhancements or new actions implemented in FY 17-18. Include any new or redirected efforts to increase the focus towards these new or enhanced actions.
- **Other Types of Actions:** Describe activities designed after the MRP effective date (i.e., December 2009) and continued in FY 17-18, and any enhancements or new (post December 2009 effective date) actions implemented in FY 17-18.

C.10.b.ii ► Trash Reduction – Other Trash Management Actions (PART B)

Provide the following:

- 1) A summary of the on-land visual assessments in each TMA (or control measure area), including the street miles or acres available for assessment (i.e., those associated with VH, H, or M trash generation areas not treated by full capture systems), the street miles or acres assessed, the % of available street miles or acres assessed, and the average number of assessments conducted per site within the TMA; and
- 2) Percent jurisdictional-wide trash reduction in FY 17-18 attributable to trash management actions other than full capture systems implemented in each TMA; OR
- 3) Indicate that no on-land visual assessments were performed.

If no on-land visual assessments were performed, check here and state why:

X

Explanation: No OVTAs were conducted in TMA #1 or 9 in FY 17/18 because either full capture systems are planned, or no street lengths are available for assessments.

TMA ID or (as applicable) Control Measure Area	Total Street Miles ⁵⁶ Available for Assessment	Summary of On-land Visual Assessments ⁵⁷			Jurisdictional-wide Reduction (%)
		Street Miles or Acres Assessed	% of Available Street Miles or Acres Assessed	Avg. # of Assessments Conducted at Each Site ^{58,59}	
1	0.97	0.00	0.0%	0.0	0.0%
2	3.80	0.75	19.7%	5.8	9.8%
3	0.93	0.40	42.8%	4.5	3.4%
4	2.09	0.40	19.2%	3.0	0.0%
5	5.83	1.81	31.0%	5.1	9.7%

⁵⁶ Street miles are defined as the street lengths and do not include curbs associated with medians.

⁵⁷ Assessments conducted between July 2016 and July 2018 are assumed to be representative of trash levels in FY 17-18 and were therefore used to calculate the jurisdictional-wide reductions reported in this section.

⁵⁸ Each assessment site is roughly 1,000 feet in length.

⁵⁹ Based on analyses conducted as part of the BASMAA *Tracking California's Trash* project funded by the State Water Resources Control Board, the optimal number of assessment events to detect an improvement in trash levels is between 4 and 6 per site.

6	1.01	0.35	35.1%	6.0	1.3%
7	1.86	0.54	29.1%	6.0	1.6%
8	0.38	0.38	100.0%	3.0	0.1%

C.10.b.iv ► Trash Reduction – Source Controls

Provide a description of each jurisdictional-wide trash source control action implemented to-date. For each control action, identify the trash reduction evaluation method(s) used to demonstrate on-going reductions, summarize the results of the evaluation(s), and estimate the associated reduction of trash within your jurisdictional area. Note: There is a maximum of 10% total credit for source controls.

Source Control Action	Summary Description & Dominant Trash Sources and Types Targeted	Evaluation/Enforcement Method(s)	Summary of Evaluation/Enforcement Results To-date	% Reduction
Single Use Bag Ordinance	The City adopted an Ordinance on April 22, 2013 banning the distribution of single-use plastic carryout bags. The Ordinance went into effect 30 days later http://gcode.us/codes/southsanfrancisco/ (Title 8 chapter 8.64 Reusable Bags). The focus of the Ordinance was to minimize pedestrian and wind-blown litter consisting of single-use plastic bags. The San Mateo County Environmental Health Division has been authorized and directed to enforce this Ordinance	On behalf of all SMCWPPP Permittees, the County of San Mateo conducted assessments evaluating the effectiveness of the single use plastic bag ban in municipalities within San Mateo County. Assessments conducted by the County included audits of businesses and surveys of customer bag usage at many businesses in San Mateo County. Additionally, the number of complaints by customers was also tracked by the County. The results of assessments conducted by these cities are gauged to be representative of all SMCWPPP Permittees, given the consistency between the scope, implementation, and enforcement of the	Results of assessments conducted by the County of San Mateo on behalf of all municipalities in San Mateo County indicate that the City of South San Francisco's ordinance is effective in reducing the number of single use plastic bags in stormwater discharges. This preliminary conclusion is based on the very small number of complaints received from customers about businesses in San Mateo County that are continuing to use single use plastic bags after ordinances were adopted. Typically, single use bags are 8% of the trash observed in stormwater discharges, the City of South San Francisco concludes that there has been a 7% (i.e., 8% x	7%

		<p>ordinances among the municipalities.</p> <p>The City of SSF developed its % trash reduced estimate using the following norms:</p> <ol style="list-style-type: none"> 1.) Single use plastic bags comprise 8% of the trash discharged from stormwater conveyances, based on the Regional Trash Generation Study conducted by BASMAA; 2) 95% of single use plastic bags distributed in the City of South San Francisco are affected by the implementation of the ordinance, based on the County of San Mateo's Environmental Impact Report; and 3) Of the bags affected by the ordinance, there are now 90% less bags being distributed, based on customer complaints received by the County of San Mateo's Department of Environmental Health Services. This is conservative estimate given that in FY 13-14 Environmental Services only received complaints about 4, of the over 1900 businesses in San Mateo County that are affected by the single-use plastic bag ordinances. 	<p>86% effectiveness in reducing bags) reduction in trash in stormwater discharges as a result of the City of South San Francisco's ordinance.</p>	
<p>Expanded Polystyrene Food Service Ware Ordinance</p>	<p>The City adopted the polystyrene food ware packaging ban on October 8, 2008, which prohibits food vendors from distributing food to customers in polystyrene packaging. The</p>	<p>Although the City of South San Francisco has adopted and implemented an ordinance prohibiting the distribution of</p>	<p>Results of assessments that are representative of the City of South San Francisco, but were conducted by the cities of Los</p>	

	<p>focus of the ban was to minimize pedestrian and wind-blown litter consisting of polystyrene food service ware. City Code Enforcement Staff enforces the ban within the city. http://qcode.us/codes/southsanfrancisco/ (Title 8 chapter 8.60 Green Food Packaging).</p>	<p>EPS food ware by food vendors, evaluations of the effectiveness of the ordinance have not yet been conducted. For the purpose of estimating trash reductions in stormwater discharges associated with the ordinance, the results of assessments conducted by the cities of Los Altos and Palo Alto were used to denote the reduction of trash associated with the City of South San Francisco's ordinance. Assessments conducted by the cities of Los Altos and Palo Alto were used to gauge the reduction of trash associated with the City of South San Francisco's ordinance. Assessments conducted by these cities were conducted prior to and following the effective date of their ordinances, and include audits of businesses and/or assessments of EPS food ware observed on streets, storm drains and local creeks. The results of assessments conducted by these cities are expected to be representative of the effectiveness of the City of South San Francisco's ordinance because the implementation (including enforcement) of the City of South San Francisco's ordinance is similar to the City of Los Altos' and Palo Alto's.</p>	<p>Altos and Palo Alto, indicate that South San Francisco's ordinance is effective in reducing EPS food ware in stormwater discharges. This conclusion is based on the following valuation -an average of 95% of businesses affected by the ordinance are no longer distributing EPS food ware post-ordinance. Based on these results, the estimated average reduction of EPS food ware in stormwater discharges is 90%. Supposing EPS food ware is 6% of the trash observed in stormwater discharges, the City of South San Francisco concludes that there has been a 5% (i.e., 6% x 90%) reduction in trash in stormwater discharges as a result of the ordinance.</p>	<p>5%</p>
--	---	---	--	-----------

		<p>The City of south San Francisco developed its % trash reduced estimate using the following assumptions:</p> <ol style="list-style-type: none"> 1.) EPS food ware comprises 6% of the trash discharged from stormwater conveyances, based on the Regional Trash Generation Study; 2) 80% of EPS food ware distributed by food vendors or sold via stores in the City of South San Francisco is affected by the implementation of the ordinance; and 3) There is now 95% less EPS food ware being distributed, sold and/or observed in the environment, based on assessments conducted by the City of Palo Alto and City of Los Altos.

C.10.b.v ► Trash Reduction – Receiving Water Monitoring

Report on the progress of developing and testing your agency’s trash receiving water monitoring program.

Guidance:

In FY 17-18, the City began implementing the BASMAA regional Trash Monitoring Program Plan that was approved by the Water Board’s Executive Officer. Implementation included preparing for and conducting qualitative assessments and quantitative monitoring in receiving water locations in San Mateo County. Implementation occurred through the City’s participation in the San Mateo Countywide Water Pollution Prevention Program (SMCWPPP). Additional information on accomplishments in FY 17-18 can be found in the Trash Receiving Water Monitoring Progress Report included in the SMCWPPP FY 17-18 Annual Report.

C.10.c ► Trash Hot Spot Cleanups

Provide the FY 17-18 cleanup date and volume of trash removed during each MRP-required Trash Hot Spot cleanup during each fiscal year listed. Indicate whether the site was a new site in FY 17-18.

Trash Hot Spot	New Site in FY 17-18 (Y/N)	FY 17-18 Cleanup Date(s)	Volume of Trash Removed (cubic yards)				
			FY 2013-14	FY 2014-15	FY 2015-16	FY 2016-17	FY 2017-18
SSF01	N	9/16/2017	2.8	1.3	5.2	1.2	5.5
SSF02	N	9/16/2017	2.8	1.3	5.2	1.2	5.5

C.10.d ► Long-Term Trash Load Reduction Plan	
Provide descriptions of significant revisions made to your Long-term Trash Load Reduction Plan submitted to the Water Board in February 2014. Describe significant changes made to primary or secondary trash management areas (TMA), baseline trash generation maps, control measures, or time schedules identified in your plan. Indicate whether your baseline trash generation map was revised and if so what information was collected to support the revision. If your baseline trash generation map was revised, attach it to your Annual Report.	
Description of Significant Revision	Associated TMA
In FY 15-16, consistent with all MRP Permittees, all public K-12 schools, college and university parcels were made non-jurisdictional on the City's baseline trash generation maps. Under California Government Code Sections 4450 through 4461, the construction, modification, or alternation of facilities and/or structures on these parcels are under the jurisdiction of the California Division of State Architect and not the City. The public right-of-way (e.g., streets and sidewalks) surrounding these parcels remain as jurisdictional on the City's baseline trash generation maps. The City's revised baseline trash generation map was included as Appendix 10-2 in the FY 15-16 Annual Report.	All applicable
In FY 15-16, TMA 8 in the baseline trash generation map was changed from medium to low trash generation based on field observations and information regarding the TMA, and confirmed via visual assessment. TMA 8 consists of the Genentech campus, which employs a large maintenance team that cleans the area at least daily. Please see Attachment E for the revised SSF baseline trash generation map.	8
South SF Scavenger agreed in January 2014, to do an audit of a certain section of MFD properties in TMA 1 during 2014 that would entail ensuring businesses are receiving the proper level of service and assessing any container issues and housekeeping issues that may be contributing to litter reaching the environment and storm drain system. Due to various circumstances, this audit was postponed and will now occur during FY 2016-2017 (tentatively planned to begin September 2016). Subsequent audits are possible depending on the results of this initial one.	1
The City of SSF had originally planned to install a new stormwater pump station in FY 14-15 at South Airport Blvd and Mitchell Avenue to replace an existing pumping system. The new station was scheduled to include a full trash capture device. Although this pump station was retro-fitted in FY 2014-2015, the planned trash capture device was not installed at that time, pending further study and receipt of the City's Storm Drain Master Plan, which was finalized during FY 2015-2016. This location is still a potential option for a full trash capture device per the recently completed SSF Trash Reduction Plan.	5
The City of SSF had originally planned to install a large full trash capture device in FY 14-15 in this TMA at an existing stormwater pump station. However, the planned trash capture device was not installed during this time, pending further study and receipt of the City's Storm Drain Master Plan, which was finalized during FY 2015-2016. This location is still a potential option for a full trash capture device per the recently completed SSF Trash Reduction Plan.	4
The Long-Term Trash Plan and <i>South San Francisco Trash Capture Feasibility Study</i> (Schaaf & Wheeler, 2016) determined that the most feasible way for the City to meet the 70% trash reduction goal was through five (5) large scale trash capture devices towards the end of the City's storm drainage system prior to discharging to Colma Creek. These devices were to be installed in strategic medium-high trash generation areas and would have provided a centralized location for construction, maintenance and cleaning, as well as relatively low annual Operation and Maintenance (O&M) costs. The City continued to pursue these devices and hired Schaaf & Wheeler to start the design process. The <i>South San Francisco Trash Capture Conceptual Design Memo</i> (Schaaf & Wheeler, 2017) detailed the site logistics and provided conceptual design drawings to show that the five	1,4,5

locations were suitable for large scale device installation. The cost estimate for the large scale devices was between \$2,700,000 and \$5,000,000.

The City had been involved in the design phase through February 2017. However, due to limited stormwater funding, lengthy design and construction process, and the high capital investment costs the City's preferred large trash capture device approach was deemed infeasible to meet the 70% trash reduction by July 1, 2017.

Therefore, the City has changed course and with the assistance of Schaaf & Wheeler, has determined that installing between 250-300 full trash capture inlet filters in TMA#s 1, 4 and 5, at an estimated capital cost of \$150,000 to \$165,000 would provide the required 70% trash reduction.

C.10.e. ► Trash Reduction Offsets (Optional)

Provide a summary description of each offset program implemented, the volume of trash removed, and the offset claimed in FY 17-18. Also, for additional creek and shoreline cleanups, describe the number and frequency of cleanups conducted, and the locations and cleanup dates. For direct discharge control programs approved by the Water Board Executive Officer, also describe the results of the assessments conducted in receiving waters to demonstrate the effectiveness of the control program. Include an Appendix that provides the calculations and data used to determine the trash reduction offset.

Offset Program	Summary Description of Actions and Assessment Results	Volume of Trash (CY) Removed/Controlled in FY 17-18	Offset (% Jurisdiction-wide Reduction)
Additional Creek and Shoreline Cleanups (Max 10% Offset)	NA	NA	NA
Direct Trash Discharge Controls (Max 15% Offset)	NA	NA	NA

Appendix 10-1. Baseline trash generation and areas addressed by full capture systems and other control measures in Fiscal Year 17-18. ⁶⁰

TMA	2009 Baseline Trash Generation (Acres)					Trash Generation (Acres) in FY 17-18 After Accounting for Full Capture Systems					Jurisdiction-wide Reduction via Full Capture Systems (%)	Trash Generation (Acres) in FY 17-18 After Accounting for Full Capture Systems and Other Control Measures					Jurisdiction-wide Reduction via Other Control Measures (%)	Jurisdiction-wide Reduction via Full Capture AND Other Control Measures (%)

Section 11 - Provision C.11 Mercury Controls

C.11.a ► Implement Control Measures to Achieve Mercury Load Reductions
C.11.b ► Assess Mercury Load Reductions from Stormwater

See the SMCWPPP FY 2017-18 Annual Report for updated information on:

- Documentation of mercury control measures implemented in our agency’s jurisdictional area for which load reductions will be reported and the associated management areas;
- A description of how the BASMAA Interim Accounting Methodology⁶¹ was used to calculate the mercury load reduced by each control measure implemented in our agency’s jurisdictional area and the calculation results (i.e., the estimated mercury load reduced by each control measure);
- Supporting data and information necessary to substantiate the load reduction estimates; and
- For Executive Officer approval, any refinements, if necessary, to the measurement and estimation methodologies to assess mercury load reductions in the subsequent permit.

C.11.c ► Plan and Implement Green Infrastructure to Reduce Mercury Loads

See the SMCWPPP FY 2017-18 Annual Report for information on the quantitative relationship between green infrastructure implementation and mercury load reductions, including all data used and a full description of models and model inputs relied on to establish this relationship.

C.11.e ► Implement a Risk Reduction Program

A summary of countywide and regional accomplishments for this sub-provision are included in the SMCWPPP FY 2017-18 Annual Report.

⁶¹BASMAA 2017. Interim Accounting Methodology for TMDL Loads Reduced, Version 1.0. Prepared for BASMAA by Geosyntec Consultants and EOA, Inc., September 19, 2016.

Section 12 - Provision C.12 PCBs Controls

C.12.a ► Implement Control Measures to Achieve PCBs Load Reductions
C.12.b ► Assess PCBs Load Reductions from Stormwater

See the SMCWPPP FY 2017-18 Annual Report for:

- Documentation of PCBs control measures implemented in our agency's jurisdictional area for which load reductions will be reported and the associated management areas;
- A description of how the BASMAA Interim Accounting Methodology⁶² was used to calculate the PCBs load reduced by each control measure implemented in our agency's jurisdictional area and the calculation results (i.e., the estimated PCBs load reduced by each control measure);
- Supporting data and information necessary to substantiate the load reduction estimates; and
- For Executive Officer approval, any refinements, if necessary, to the measurement and estimation methodologies to assess PCBs load reductions in the subsequent permit.

C.12.c ► Plan and Implement Green Infrastructure to Reduce PCBs Loads

See the SMCWPPP FY 2017-18 Annual Report for information on the quantitative relationship between green infrastructure implementation and PCBs load reductions, including all data used and a full description of models and model inputs relied on to establish this relationship.

C.12.e ► Evaluate PCBs Presence in Caulks/Sealants Used in Storm Drain or Roadway Infrastructure in Public Rights-of-Way

A summary of countywide and regional accomplishments for this sub-provision is included in the SMCWPPP FY 2017-18 Annual Report.

⁶²BASMAA 2017. Interim Accounting Methodology for TMDL Loads Reduced, Version 1.0. Prepared for BASMAA by Geosyntec Consultants and EOA, Inc., September 19, 2016.

C.12.f ► Manage PCB-Containing Materials and Wastes During Building Demolition Activities So That PCBs Do Not Enter Municipal Storm Drains

A summary of countywide and regional accomplishments for this sub-provision is included in the C.12 PCBs Controls section of the SMCWPPP FY 2017-18 Annual Report.

Does your agency plan to seek exemption from this requirement?

Yes

No

C.12.g. ► Fate and Transport Study of PCBs: Urban Runoff Impact on San Francisco Bay Margins

A summary of countywide and regional accomplishments for this sub-provision are included in the SMCWPPP FY 2017-18 Annual Report.

C.12.h ► Implement a Risk Reduction Program

A summary of countywide and regional accomplishments for this sub-provision are included in the SMCWPPP FY 2017-18 Annual Report.

Section 13 - Provision C.13 Copper Controls

C.13.a.iii.(3) ► Manage Waste Generated from Cleaning and Treating of Copper Architectural Features

Provide summaries of permitting and enforcement activities to manage waste generated from cleaning and treating of copper architectural features, including copper roofs, during construction and post-construction.

Summary:

During construction, City of SSF Environmental Compliance and Building Inspectors are responsible for identifying copper architectural features, and if appropriate, BMPs are implemented. Any issues noted are documented and enforcement actions are recorded in the Provision C.6 erosion control inspection tracking sheet.

Post-construction, City of SSF Environmental Compliance Inspectors are responsible for responding to, investigating and identifying illegal discharge of wash water from washing copper architectural features. Any enforcement actions or reported discharges are recorded in the Provision C.5 Illicit Discharge inspection records and tracking sheet.

The SMCWPPP "Requirements for Architectural Copper" Fact Sheet is made available to the public, construction inspectors and illicit discharge inspectors on the SMCWPPP website (www.flowstobay.org/files/newdevelopment/flyersfactsheets/ArchitecturalcopperBMPs.pdf). Inspectors are made aware of the concerns with copper architectural features at SMCWPPP Training Workshops and internal municipal trainings.

C.13.b.iii.(3) ► Manage Discharges from Pools, Spas, and Fountains that Contain Copper-Based Chemicals

Provide summaries of any enforcement activities related to copper-containing discharges from pools, spas, and fountains.

Summary:

Upon review of our Provision C.5 illicit discharge inspection data we found no enforcement activities related to copper-containing discharges from pools, spas, and fountains.

C.13.c.iii ► Industrial Sources Copper Reduction Results

Based upon inspection activities conducted under Provision C.4, highlight copper reduction results achieved among the facilities identified as potential users or sources of copper, facilities inspected, and BMPs addressed.

Summary:

The City of South San Francisco had one plating facility that was inspected twice a year. This facility ceased operations on 10/21/15 and has vacated the premises. No stormwater issues have historically occurred at this site. City Environmental Compliance staff reviews Business License Applications for all new businesses entering the service area in order to determine potential copper users or sources of copper – which are followed up with inspections if applicable.

Section 15 -Provision C.15 Exempted and Conditionally Exempted Discharges

C.15.b.vi.(2) ► Irrigation Water, Landscape Irrigation, and Lawn or Garden Watering

Provide implementation summaries of the required BMPs to promote measures that minimize runoff and pollutant loading from excess irrigation. Generally the categories are:

- Promote conservation programs
- Promote outreach for less toxic pest control and landscape management
- Promote use of drought tolerant and native vegetation
- Promote outreach messages to encourage appropriate watering/irrigation practices
- Implement Illicit Discharge Enforcement Response Plan for ongoing, large volume landscape irrigation runoff.

Summary:

See Section C.9.e.ii of SMCWPPP's FY 17-18 Annual Report for a description of SMCWPPP's activities related to point-of-purchase outreach which promotes less toxic pest control and landscape management. See Section C.7 of SMCWPPP's FY 17-18 Annual Report for a description of outreach conducted to promote water conservation programs, such as promoting rain barrel use. Information on water conservation, less-toxic pest control and appropriate watering/irrigation practices is also posted on SMCWPPP's website (www.flowstobay.org).

City of SSF Environmental Compliance staff makes these Countywide outreach materials available and distributes them as applicable during local outreach events (ex. Farmers' Markets, Pollution Prevention Week). Additionally, City of SSF Environmental Compliance staff distributes these Countywide materials through the Illicit Discharge program and during the Building Permit review process, as applicable.
